PREFATORY.

In presenting to the General Assembly of Maryland the Forty-ninth annual report of this board, the hope is indulged that its contents will include such statistics and other information as shall make it easy to understand the true conditions of our public school system. The department of public education is the most costly branch of our State government. This fact suggests its relative importance and it is fair to assume that the administration of our school system, the character of school buildings in use, the quality of instruction given in the school room, educational standards employed and methods of taxation to raise and apportion school funds should claim their proportionate share of the best thought of the people's legally appointed representatives in the legislature of 1916.

In a comparative study of the several state systems it will be found that our state school appropriations are liberal. There can be no quarrel with the State as such, even on the part of those who may be considered radical on the question, that it has not fostered in a generous way, its public schools. There is need, however, for a larger public interest in school affairs. The fixing of a state school tax and then dismissing the matter as one with which the General Assembly has nothing further to do, has bred an indifference to school conditions which hinders school development in even the remote sections of the State. The importance of an enterprise or a work is usually determined, in the average mind, by the amount of consideration given it in public discussion or private conversation. A state-wide movement—a state school system—involving an annual expenditure of more than five million dollars, an agency of the commonwealth which touches every taxpayer's pocketbook for support, and the center of every community's life and activities should be the most *talked-about* project of the State when people meet whether in the General Assembly or the community gathering. We must not believe in a mere perfunctory way but *realize* that the public school is the most basal institution supporting a democracy, and the greatest social organization in our American life.

Much has transpired since the last session of the legislature to bring the school question closer to the people and to claim for it that consideration which its importance requires. The educational mass-meeting, the school exhibit and the athletic meet have been continued until all the counties have been enlisted in the crusade to bring about

a right popular attitude toward public education. We feel encouraged to believe that the efforts to bring about this result are bearing good fruit in an aroused public interest in the school and its work which will support in a most effective and intelligent way whatever may be attempted to increase school efficiency.

SCHOOL SURVEY COMMISSION.

Another agency the work of which during the year of 1915 should bring stimulation and sound advice is the Maryland School Survey Commission. Dr. Abraham Flexner, the educational expert of the General Education Board and his assistant Dr. Frank P. Bachman have made rather an extensive examination of school conditions in each county of the State, and the skillful manner in which they did their work has impressed both state and county school officials that they are indeed *experts* in measuring school efficiency and in suggesting methods and means which will best attain it. The report of the Commission should be read and discussed in every school community and it is hoped that the members of the legislature will find time to give to it the serious thought it merits.

A SCHOOL ATTENDANCE LAW.

A few years ago the Russell Sage Foundation made a comparative study of state school systems in the United States basing the comparison on ten tests of efficiency. Of course all states which maintained a separate system for colored pupils ranked low in that test, and there was some gratification that Maryland stood near the top of those states that maintained two school systems. But when we examine closely the results of that comparison it is safe to say that no other one factor contributes so generously to our poor showing in vital school statistics as does the absence of a state-wide mandatory school attendance law. Since 1902 when such a bill was presented to the legislature and became a law only for Baltimore City and Allegany County, there have been repeated efforts to put Maryland straight on this question and by so doing to add another essential element of an effective state school system. But little progress has been made. What law there is on the statute books is puerile and defenceless. During these years several states south of us with less resources have passed such laws until today Maryland is the most notable exception. The fact that it ranks very low on the test of literacy is not the most serious aspect of the problem. Some schooling in those instrumental knowledges which will class such as study them as literates is good as far as it goes. But the State if first concerned in the quality of its citizenship and its primary purpose in establishing a system of schools was to make its people intelligent and law abiding citizens. To teach

boys and girls to read, spell and *cipher* will not necessarily make them good citizens. They must be *trained* into habits of obedience, honesty, punctuality, etc., which habits will control them when they are men and women, and these cannot be acquired in a few months. It requires years of patient training by a big-souled teacher to inculcate right mental, moral and physical habits. There can be offered no sufficient reason why children should not spend their time in school between the ages of six and fourteen; and while a law would likely limit attendance to 100 or 120 days of the year, it will appear as the law may operate from year to year, that the child had better spend the entire time in school both for the good of the child and the orderly and healthful procedure of school work.

HIGH SCHOOLS.

There is undeniable proof that since the legislature of 1910 established a state system of approved high schools, secondary education in Maryland has been advancing in "leaps and bounds." It is pleasant to learn from several sources that the plan in force here in extending state aid to these schools is most liberal and is generously endorsed. Since the present high school law went into effect the number of enrolled students in our secondary schools has increased more than one hundred per cent. There are now about seventy of these schools and the State is expending annually about $125,000. and the counties as much more to maintain them. It would seem necessary for the State to provide an inspector for this large and growing work who should give his entire time to their supervision. Another phase of the aid which the State is extending to its high schools needs careful consideration. The appropriation for aiding these schools is a charge on the public school tax. The appropriation has increased from $96,000. in 1910 to $125,000. in 1915.

It is a delicate matter for the State department of Education to decide what proportion of the state school fund should be apportioned to aid high schools. As the law now stands the more that is given to high schools the less there is for the support of the elementary schools. It would seem desirable for the General Assembly to determine what percentage of the state school funds should be set aside for secondary and also for elementary schools. At the rate that we are now going it will not be many years before we shall have at least one hundred high schools with a system supporting them second to no other state, but we do not want to feel that in making our high schools excellent we have decreased the efficiency of the elementary school.

A MINIMUM COLORED SCHOOL YEAR.

Another obstacle to the successful operation of our State school system is the distressingly short time the colored schools are kept open in some of the counties. In Anne Arundel these schools are maintained only for four months of the year and further facilities must be provided by the colored people themselves. In some other counties where the colored population is large the school year is only five months. It can be easily seen that the type of colored teacher employed in Anne Arundel County with four months' school is necessarily inferior. The good teachers go elsewhere. To avoid such awkward situations the State should make it a requirement that every county should keep its colored schools open for at least seven months. With such a provision much better work can be accomplished from every view-point.

In seventeen counties the State makes a special appropriation of fifteen hundred dollars to encourage industrial education. Each of these counties has a supervisor for such work, and it would seem like an extravagance to make provision of this character for counties with but a four or five months' school year.

Attention is called especially to table "L" which shows that ten of the twenty-three counties spend less on their colored schools than they receive from the State through the apportionment on account of colored population between the ages of 5 and 20 years. Three other counties spend approximately the same as is received from the State. In counties where this condition exists a year of less than seven months for the colored schools cannot be consistently defended.

Respectfully submitted,

PHILLIPS LEE GOLDSBOROUGH, President.
M. BATES STEPHENS, Secretary.
THOMAS H. LEWIS,
HENRY C. LONGNECKER,
THOMAS H. BOCK,
WILLIAM T. WARBURTON,
JOHN O. SPENCER,

NOTE.—The above figures are taken from the reports of the Comptroller and are for fiscal years ending September 30. The appropriation for colored industrial work is made from the general treasury, and does not enter into the above computation. It has ranged during the ten-year period from $10,500 in 1906 to $22,500 in 1915. The income from the "Free School Fund" is not included in the above tabulation. It has remained about the same for the period, $50,980.14 in 1906 and $48,454.54 in 1915.

*Amount is for part of scholastic year only.

STATISTICAL SUMMARY.

A summary of school statistics for the year ending July 31, 1915:

Number of schools in counties	2,365
Number of schools in Baltimore City	111
Total	2,476
Being a decrease in 1915 of 9.	
Number of months schools were open, counties (average)	9.34
Number months schools were open, city	10,00
Average	9.67
Being the same as in 1914.	
Number of teachers in counties	4,269
Number of teachers in Baltimore City	1,953
Total	6,222
Being an increase in 1915 of 226.	
Number of different pupils, counties	159,786
Number of different pupils, city	97,481
Total	257,267
Being an increase in 1915 of 12,009.	
Average number in daily attendance, counties	105,157
Average number in daily attendance, city	62,774
Total	167,931
Being an increase in 1915 of 7,650.	
Receipts from all sources, counties	$3,048,705.50
Receipts from all sources, city	2,608,404.39
Total	$5,657,109.89
Being a decrease in 1915 of $334,794.58.	
Amount received from State by counties and city	$1,594,618.55
Amount received from county and city local tax	3,218,741.34
Total	$4,813,359.89
Amount of local levy in cents on each $100. (counties)	35.6c.
Amount of local levy in cents on each $100. (city)	31.8c
Amount of local levy in cents on each $100. (State)	33.4c
Total expenses for public school purposes, counties	$3,048,935.58
Total expenses for public school purposes, city	2,565,014.01
Total	$5,613,949.59
Being a decrease in 1915 of $369,903.03.	
Amount of teachers' salaries, counties	$1,890,135.46
Amount of teachers' salaries, city	1,605,588.92
Total	$3,495,724.38
Being an increase in 1915 of $224,473.09.	
Amount paid for building, repairing and furnishing schoolhouses, counties	$333,815.50
Amount paid for building, repairing and furnishing schoolhouses, city	308,591.14
Total	$642,406.64
Being a decrease in 1915 of $646,185.35.	

Amount paid for rent, fuel and incidentals, counties	$223,923.38
Amount paid for rent, fuel and incidentals, city	116,236.16
Total	$340,159.54
Being an increase in 1915 of $44,321.56.	
Amount paid for miscellaneous expenses	264,901.72
Being an increase in 1915 of $17,246.91.	
Number of pupils in First Grade, January 1, 1915	55,673
Being a decrease in 1915 of 721.	
Number of pupils in Second Grade	31,926
Being an increase in 1915 of 8.	
Number of pupils in Third Grade	31,420
Being an increase in 1915 of 89.	
Number of pupils in Fourth Grade	29,290
Being an increase in 1915 of 1,078.	
Number of pupils in Fifth Grade	24,612
Being an increase in 1915 of 694.	
Number of pupils in Sixth Grade	17,884
Being an increase in 1915 of 984.	
Number of pupils in Seventh Grade	12,555
Being an increase in 1915 of 155.	
Number of pupils in Eighth Grade	7,664
Being an increase in 1915 of 610.	
Number of pupils in Ninth Grade	4,074
Being an increase in 1915 of 229.	
Number of pupils in Tenth Grade	2,752
Being an increase in 1915 of 338.	
Number of pupils in Eleventh Grade	2,630
Being an increase in 1915 of 318.	
Total enrollment January 1, 1915	220,480
Being an increase in 1915 of 3,782.	
Percentage of attendance	80.4%
Being an increase in 1915 of 1.6%.	
Per capita cost	$21.78
Being an increase in 1915 of $1.05.	
Value of school property, counties	$5,044,870.00
Value of school property, city	6,065,717.00
Total	$11,110,587.00
Being an increase in 1915 of $302,725.

HIGH SCHOOLS.

A SUMMARY OF REQUIREMENTS FOR HIGH SCHOOLS.

FIRST GROUP.

In order that first group high schools may comply with the requirements of the school law and the by-laws of the State Board of Education, they must satisfy the following conditions:

1. A bona fide enrollment of 80 or more students.
2. Four or more academic teachers—full time or equivalent.
3. A four years' course of at least 36 actual school weeks in each year.
4. All courses of study shall conform to those prescribed by the State Board of Education.
5. Salary of principal shall be $1,200 or more, and that of assistants regularly employed not less than $500 annually, and same shall be increased for experience as provided by Chapter 651, Acts 1914.
6. In addition to the regular academic course, shall provide manual training and household economic courses.
7. Must provide a commercial or an agricultural course.
8. A library of at least 100 volumes related to secondary work.
9. A separate room set aside as a laboratory, suitable for experimental and demonstration work in physics, chemistry and agriculture. (This does not mean part of a recitation room.)
10. At least $250 worth of apparatus and material for science work, until the State Board increases this minimum.
11. The diploma must show the course taken, group of school and number of years of instruction given. The form shall be prescribed by the State Superintendent, and each diploma shall be signed by him before being issued to high school graduates.
12. Qualifications of all teachers shall be passed upon by the State Board of Education.

SECOND GROUP.

In order that second group high schools may comply with the requirements of the school law and by-laws of the State Board of Education, they must satisfy the following conditions:

1. A bona fide enrollment of 35 or more students.
2. Two or more academic teachers—full time or equivalent.
3. A three years' course of at least 36 actual school weeks in each year.

4. All courses of study shall conform to those prescribed by the State Board of Education.

5. Salary of principal shall be $1,000 or more, and that of assistants regularly employed not less than $500 annually, and same shall be increased for experience as provided by Chapter 651, Acts 1914.

6. In addition to the regular academic course, shall provide one of the following three courses: Manual training, agriculture, commercial work.

7. May extend course to four years by the employment of such additional teacher or teachers as the State Board may require, and where this is done the manual training course shall include household economics for girls.

8. A library of at least 100 volumes related to secondary work.

9. A separate room set aside as laboratory, suitable for experimental and demonstration work in physics, chemistry and agriculture. (This does not mean part of a recitation room.)

10. At least $250 worth of apparatus and material for science work, until the State Board increases this minimum.

11. The diploma must show the course taken, group of school and number of years of instruction given. The form shall be prescribed by the State Superintendent. Each diploma shall be signed by him before being issued to high school graduates.

12. Qualifications of all teachers shall be passed upon by the State Board of Education.

PUBLIC HIGH SCHOOLS OF THE FIRST GROUP.

Approved by the State Board of Education, Year Ending July 31, 1915.

RURAL SCHOOLHOUSES AND GROUNDS.

LEADING PASSAGES FROM A BULLETIN

BY FLETCHER B. DRESSLAR.

SOME CONDITIONS AND OPPORTUNITIES IN RURAL LIFE.

Rural life in the United States is in many respects different from that of any other country and especially that of continental Europe. There is probably more isolation in farm life in this country than in any other progressive country of the world, unless it be in parts of the Canadian northwest. The European farmer lives, as a rule, in a village and goes to and from his farm daily. The village church, the public garden, and the public halls give him opportunities for society and fellowship during his leisure hours. Cooperation, companionship, and social solidarity bring satisfaction and contentment. Such opportunities are not to be had in many of our rural communities at any cost.

The field of service of the country school must include the general needs and longings of country people. The rural schools must set themselves to the task of creating a more satisfying educational fellowship in country communities. They must bring people together for the sake of comradeship and for the sake of community interests. They must teach the economic, social, hygienic, and religious importance of civic unity and civic righteousness. They must make it plain to all the people that this is an age of cooperation and that we can not live unto ourselves without limiting our own happiness and endangering the success of others.

The public school is the only institution in which all are interested and through which all may cooperate. The schoolhouse door must swing open freely for all who would work for the public good, and the schoolhouse must be so constructed as to invite to its shelter all who seek for a larger vision in anything and everything that may contribute to the community welfare. Above the door of every rural schoolhouse in this land some such legend as the following should be inscribed and through the work of patrons and teacher its sentiment be woven into the fiber of the people: *This building is dedicated to the service of this community and to the common cause of a better life for all.*

THE TEACHER'S HOME AND FARM.

3. The time is coming when the people will learn that it pays to hire competent men as teachers of country schools and to furnish them homes on the school grounds. Then a real experimental school farm will be easily managed and all the needs of the community can be centered in a school curriculum. It would be easier to arrange for consecutive and constructive work when conditions are such that a country teacher can see the possibilities of a useful and prosperous life ahead. To allow the schoolhouse and school grounds to lie idle all summer and to depend on young and inexperienced teachers for the educational leadership of the community is poor economy. The one paramount need in most rural schools is a teacher with ideals and with the desire to focus the attention and interest of every man, woman, and child in the district on the work done in and about the schoolhouse.

Suppose there is a small school farm, a home for the teacher, and a building arranged to accommodate the intellectual and social needs of the community, what could a virile man in charge, employed for the year instead of for a few months, do under such conditions? He could make the farm pay half of his salary and at the same time make it the most effective teaching agency connected with the school. He could develop a community interest and pride in the school now sadly lacking in most country districts. He could be the social guide for all the young people, those out of school as well as those in school. If he were musical, and most certainly he ought to be, he could develop some sort of a neighborhood orchestra and chorus which would furnish an incentive and a means of entertainment for all religious and social gatherings.

The village schoolmaster of Germany has a house and garden on the school grounds. He settles there for a life's work and is, next to the priest or paster, the most influential and useful man in the village. But he must have had a thorough training in all the things that will make for joy and happiness in that community. First, he must be a good musician. He must be able to play the violin and the pipe organ, and in addition he must be able to sing and conduct an orchestra and a chorus. This does not mean that he must be able to do these things in a mere passable fashion; he must be a skilled musician. During the many years of his special training as a teacher his musical studies are carried on in a most exacting way, and if he fails to develop good ability he will not receive an appointment as a village schoolmaster, even if all other requirements are met. What is the result? He has an orchestra made up of old and young people in school and out of it. He is the leader of the church choir and of congregational singing. His help is demanded wherever music is desired. It would be almost impossible to over-estimate the influence his musical ability gives him with his people.

In the United States we can not move our isolated farmhouses into villages, and it is doubtful if the work of our country schools can be made as effective in this way as that of the village schools of Germany. But as long as we neglect to give the country people the uplifting and harmonizing influence of music, so long will it be more difficult to unite a community into a social and civic body. Music is preeminently a social art, and is most satisfying when enjoyed in common.

If we could have larger school grounds, a school farm, a home for the teacher, and, an all-year-round social and educational center in the community, there would be fewer desertions from farm to city.

THE LOCATION OF COUNTRY SCHOOLHOUSES.

In selecting a site for a rural schoolhouse, the following factors should be considered:

1. No site should be selected that will not offer a good outlet for tile drains set well below the walls of the building to keep the basement and garden in good condition. A wet, swampy piece of land is not only a muddy, dirty place, but it introduces dangers from ground air and moisture that will always prove troublesome and unwholesome. The air, on account of its great weight, presses into the ground to a much greater depth than is ordinarily supposed. When the air above the ground becomes colder than that in the ground, and this is true at night during warm weather and even during the day in cold weather, the heavy air above the ground will displace that in the ground, and will drive it out at the point of least resistance. Since the ground underneath and about a schoolhouse is drier than that not covered, the ground air is driven from all directions toward the schoolhouse, and by reason of the fact that the heat escaping from the building will cause an upward draft, this ground air is easily drawn into the rooms. Ground air contains a far greater percentage of carbon dioxide and other noxious gases than is ordinarily found in air above the ground. These gases are produced through the agency of the bacteria acting upon decaying animal and vegetable matter in the soil. Moreover, ground air is generally saturated with moisture, and as it rises in the schoolroom, especially at night when the building is cold, this moisture will be deposited on the walls, blackboards, and floors, so that all wooden parts of the building are rendered liable to decay and the air in the building will be stuffy and cellarlike. Unless school buildings are so built as to prevent the entrance of this ground air and the moisture brought up with it, no amount of effort on the part of the teacher will be able to keep the air always wholesome and hygienic. It is of great importance, therefore, to prevent these difficulties by selecting a site which can be kept wholesome by proper drainage.

To go to the other extreme and select a high hill or a wind-swept place for the location of the school building is also an error. What is needed is a location comparatively level, but so situated that it can be easily kept dry.

2. Other things equal, it is generally better to select a site with a frontage to the north or the south, so that the building may be planned with the short side facing toward the roadway and the long sides toward the east and the west. Such a site makes it easier on the whole to plan the building with reference to its general appearance and also with reference to its cost. In order to make this point clearer, let the reader undertake to draw a floor plan for a lot with an approach to the building from the east or the west. Either he will have to depend for his classroom on north or south light, which is to be avoided, or to face the building with the long side toward the roadway. This will introduce some architectural difficulties, for it is often much easier to get a satisfying elevation for a one-room school building with the entrance in the end rather than in the side of the building; and it is also more economical of space. Many school buildings have been doomed to bad illumination from the fact that builders have followed the custom of facing the end of the building toward the roadway, regardless of the direction from which the classroom must get its light.

However, it is not impossible to adjust a satisfactory building to a lot facing a roadway on the east or west. Several of the plans presented in this bulletin have been drawn to meet just this situation, for sometimes school authorities are limited to the selection of a site east or west of a roadway. But where there is a choice and all other considerations are even, it is better to utilize a lot with a frontage on the north or the south.

3. Another set of conditions must be taken into account, and these have to do indirectly with the lighting. Suppose a lot is selected with a north or a south frontage, and that to the east or the west of it there are high hills or mountains sufficiently near to raise the horizon line appreciably. Such a location would at once handicap the building by making it next to impossible to secure the proper amount of light from one side or the other. If high forests or mountains are near on the east, then the west light should be preferred for the class room. If this hindrance to light is on the west of the lot selected, then the east exposure would be the only one to use. Many rural school buildings located in valleys are much more seriously handicapped from the point of view of illumination than the average schoolman is conscious of.

4. Elsewhere emphasis has been laid on the fact that our school grounds are not large enough, especially from the point of view of agricultural work. The country schools will never be able to do their

work properly unless the amount of ground assigned to them is increased. Playgrounds, agricultural work, fruit growing, and forestry—all legitimate demands upon the rural school—require more land than is usually given to rural schools. But it would be possible to select a plat of ground sufficiently large and yet ill-adapted for playgrounds or for agricultural work. Hence the site selected should be on good soil, adapted for the cultivation of any or all kinds of plants or grain ordinarily grown in the neighborhood. To select a poor, sterile, rocky soil, though well situated with reference to other requirements, would be a mistake, for no teacher could, on such ground, make such a showing in agricultural experiments as would attract the favorable attention of the farmers in the community. Hilly, rough, or rocky land is not satisfactory either for playgrounds or for any other purpose to which the country school plat should be devoted.

In one case in New York State observed by the field agent of the joint committee in the summer of 1913 the schoolhouse was on a hillside and the accumulated wash down the hall had risen above the foundation to such an extent that the drainage actually "seeped through to the floor."

5. An abundant and sanitary water supply is a matter for thoughtful consideration in the selection of the site for a rural schoolhouse. A country school building is frequently located because of the proximity of a spring or a neighbor's well. The average spring in the country has proved to be a greater menace to health than people have ever dreamed of, because with increasing population and deforestation there is more opportunity both for contamination of springs and greater irregularity of water supply than was formerly the case. Spring water may appear very clear and yet be unwholesome to drink, and it is therefore risky to depend on springs for drinking water. If a site is selected with the idea of depending on a well for drinking water, it is important to take note of any possible chances for seepage into the well. If a high, rocky place is selected, it would be very difficult and expensive to sink a well to such a depth as to insure a sufficient amount of pure water. Generally speaking, a gravelly or sandy loam into which a well can be driven to a sufficient depth to prevent any surface contamination is preferable.

6. Finally, no site should be selected for a school building too close to electric lines and steam railways. Such a location offers opportunity for the introduction of a great deal of smoke and dust into the schoolroom. Further, there is always some danger due to fires or electricity when a building is situated near such lines. There is also great temptation for children to walk or play on car lines, and this

naturally introduces useless danger. The chief difficulty, however, is the noise. Some States have laws forbidding the erection of school buildings within 500 feet of railway lines, and this sort of legislation is bound to increase.

ORIENTATION OF THE BUILDING.

Doubtless some who realize the great hygienic importance of sunlight have concluded that classrooms facing toward the south are the most acceptable. This conclusion would be warranted were it not for the fact already mentioned. With direct sunlight streaming into a schoolroom during the entire school day, it is well nigh impossible to furnish proper light to all the pupils in the room. This difficulty is not serious in a dwelling, where chairs are not fastened to the floor and where people can adjust themselves so as to get proper light either for reading or for work, but in a schoolroom, where from 25 to 45 children must spend a good part of each day, it is impossible, whether the desks are fastened to the floor or not, for all of the children to adjust themselves to avoid the shifting rays of direct sunlight entering the room. If, as is usually the case and probably will be for a considerable time to come, the desks are fastened to the floor, the pupils can do little to adjust their positions so as to avoid the painful and harmful effect of direct sunlight on desk or book.

If shades are used, they will inevitably reduce the light in parts of the room below the normal demand, and hence some of the children will suffer for lack of light. Many kinds and qualities of window shades have been devised to meet these conditions, but none of them has fully overcome the difficulty suggested. Space is lacking to discuss wondow shades at length. Suffice it to say here no shade has been developed that will properly condition the direct rays of the sun to a school room so as to guard the children from eyestrain due to reflection of direct sunlight and at the same time permit the passage of sufficient light to give satisfactory illumination for all parts of the room.

The conclusion, therefore, is this: Be sure that no lot for a building is selected which will require such an orientation of the building that it will be necessary to depend on south light for the classrooms; buildings for school purposes, especially for elementary classes, should be so planned and so located on a school lot that the classrooms may receive either east or west light.

In the construction of a small building there are some advantages of the east light over the west. First an eastern exposure will permit the morning sun to take the chill out of the room before school begins. Second, it is probably true that there are in most parts of the country fewer cloudy mornings than afternoons, and hence those rooms hav-

ing windows toward the east will get a better sunning than those with windows toward the west. In those sections where foggy mornings are prevalent, the opposite would be true. buildings with east exposure the troublesome direct rays of the sun will have nearly disappeared by 10 o'clock in the morning. The shades can then be rolled up for the rest of the day. In the third place, the prevailing cold winds in the winter are more from the west and northwest than from the east, except along the eastern coast.

However, the correct choice between east and west windows will depend to a large degree on the surroundings. For example, if a school building must be placed near hills, mountains, or tall forest trees, it would be better to choose the west side for the windows, if the horizon line is high toward the east. If the opposite be true, the east side is preferable. A range of high hills or mountains often raises the horizon line so high that the sun may not appear above it until quite late in the day. Besides, even after the sun has reached the zenith, a mountain's side will not reflect back enough light to insure good illumination. A wide expanse of sky is necessary. It will be important then to study the surroundings, to note the possible hindrances and the general outlook in order to decide wisely whether the buildings should be placed to introduce east light or west light into the classrooms.

Workrooms in general are decidedly better for receiving abundant sunshine, for here benches and tables should be arranged to suit the convenience of the students, and more individual liberty is necessary. The same is true of library rooms. Toilets and cloakrooms require direct sunshine and abundance of light in order to keep them sanitary and wholesome. Proper orientation when applied to these rooms means provision for abundant light and as much direct sunshine as good sanitation demands.

THE COUNTRY SCHOOLHOUSE.

GENERAL CONSIDERATIONS.

The country schoolhouse should be beautiful. This does not mean that it needs to be expensive.

Beauty is more than economical; it is educational in the highest sense. Beauty is not for the rich; neither is it for the poor. It is for all. A beautiful country school building, appropriately located, will exert a quiet but persistent educational influence on all who are associated with it, in school or out. Its unconscious reflex influence will enter into the life of the neighborhood and of necessity express

HOUSEHOLD ECONOMICS
ANNAPOLIS HIGH SCHOOL

HOUSEHOLD ECONOMICS AND MANUAL TRAINING EXHIBITS
ANNAPOLIS HIGH SCHOOL

itself in many ways. All who see a beautiful and appropriate school building are inclined to be more loyal to the cause it represents and less satisfied with ugliness anywhere. The district schoolhouse is the only building in the community that belongs to all, and in a definite way it reflects the civic standards of all. It is, therefore, important to express through it the highest attainable ideals of beauty and fitness, so that it may serve all acceptably.

WORKROOMS NEEDED.

The rural schoolhouse should be designed to accommodate and encourage many legitimate phases of school work now generally neglected in the country. All district schoolhouses, those for one-teacher schools as well as those of the consolidated type, should have, at least, one workroom—two would be better—where manual training, domestic science, and related subjects could be taught according to laboratory methods. In a district where the number of school children does not exceed 30, one good-sized, well-lighted workroom can be made to accommodate both boys and girls by alternating their work. Here the boys can be taught to make useful articles of furniture for their homes or for the school, and to apply their arithmetic and drawing to real problems. Such work can not be done in the regular classroom. When a separate room is provided, much of the manual work can be done while the teacher is hearing other classes recite. The separate workroom will furnish an excellent opportunity to place a definite responsibility on pupils who work for a part of their time out of sight of the teacher, but near enough to call for direction whenever it is needed. Manual and domestic work is individual work and each pupil can be held to strict account for the faithful use of his or her time.

CLASSROOMS.

The size of the classroom in a district school should vary to suit the number of pupils of school age in the district, and more especially the probable number attending school. A room 30 feet long and 21 feet wide will accommodate 35 pupils, will allow for 5 rows of desks—7 desks in each row—and will give ample aisles between the seats and about them. A room 32 feet long and 24 feet wide will accommodate 40 to 45 pupils by placing 5 rows of desks and 8 to 9 desks in each row. In a room 30 feet long and 21 feet wide, such as shown in figure 16, 35 desks could be placed. The width of the aisle next the windows would be approximately 2 feet; the aisles between the rows of desks 18 inches wide; the space behind the last desk in each row 3 feet; and the space between the inner wall and the first row of desks approxi-

mately 3 feet. The space between the first seat in each row and the front end of the room would be about 8 feet. This location of the desks insures good lighting and will give sufficient space about and between the desks to manage the classes without confusion. If we could enlarge this room 1 foot in width, retaining the same number of desks, the advantage would be considerable; for then instead of 3 feet between the inner wall and the first row of desks there would be 4 feet. This suggestion is made to emphasize the need of plenty of space next the blackboard most usd by the children. The size of this room should be considered in relation to the fact that it will not be cumbered by bookcases or supplies of any sort; for it has been planned for a building which is to include workroom, library, and cloakrooms.

FLOORS OF SCHOOL BUILDINGS.

No more serious mistake can be made in the construction of a rural school building, unless it be in a failure to provide plenty of light, than in bad construction of floors. The floors of every country school should be made double, with some deadening material between them. This is necessary primarily to prevent the floors from being cold and to exclude the possibility of the entrance of ground air. The under or rough floor may be made of any well-seasoned, rough lumber, and should be laid diagonally across the floor joists and joined together carefully. When this floor is finished, it should be covered with some form of asbestos quilt, deadening felt, or, if expense must be reduced to its minimum, good quality of building paper. Upon this, at right angles with the joists, should be laid the boards of the main floor.

BLACKBOARDS FOR CLASSROOMS.

Ordinarily, the best blackboard material that can be used for rural schools without a good deal of expense is a prepared slate cement, which can be mixed and spread on as ordinary plaster. This costs more than the various forms of veneer or the preparations of pulp or cardboard now on the market, but if it is put on in the proper way it is much more permanent and will not buckle or draw away from the wall as the other material mentioned is inclined to do. If it is possible to use slate for the blackboards, it should be used by all means, for, when carefully set, it will prove more satisfactory than any sort of manufactured blackboards. Glass blackboards are still better, but they are so expensive that it is not likely that they will be used for the ordinary district school. Glass blackboards are prepared as follows: A plate of heavy glass is ground on one side lightly, but thoroughly and evenly, and is slightly roughened on the other side; then this roughened side is painted the exact color that

the board is to have. By setting this painted side against the wall the color is reflected through the glass to the other side and seems to be an integral part of the structure of the glass. The ground side is the side upon which the writing will be done. The grinding roughens the glass, which causes the chalk to leave a clear, distinct mark on it.

HEIGHT OF BLACKBOARDS.

A district school must accommodate the children of all of the elementary grades, and hence the blackboards must be placed within the reach of all the children. The mistake of placing blackboards so high that the little folk can not use them is a very common error, which those who are constructing a rural school should seek to avoid. If the blackboard on the wall opposite the windows is set 28 inches above the floor, the little folk will be able to use the lower part of this board to advantage. If the board is 3½ feet wide the larger pupils will have no difficulty in finding space at the proper height for their work. One can not do good work on a blackboard in a stooping posture, and the work can not be seen so readily if it is too high. The blackboard on the end wall near the teacher's desk will prove more satisfactory if set 3 feet above the floor and made 4 feet wide, for this space will be utilized largely by the teacher for illustrative work and for such assignments as she may wish to indicate on the board. The rear end of the room may also be utilized for blackboards when the "breeze windows" are set as indicated in the floor plans suggested. The placing of this board may correspond with that at the other end of the room—that is, it should be set 3 feet above the floor and should be about 4 feet wide. The irregular line of the blackboards about the room will not be disagreeable, despite the opinion of some architects.

TRANSOMS.

Transoms in schoolrooms, and for that matter in dwelling rooms, are largely a delusion and a snare. They are usually the dirtiest places in the room, are rarely used, and have been continued from time immemorial out of mere habit. Generally they are so far out of reach and so hard to open that they can not be used. As a result they merely add to the expense of building, gather dust, and render the room untidy. It costs a great deal more to set transoms properly than one would imagine. The "breeze windows" and the doors and windows in the adjoining rooms may be utilized for breezes in hot weather much more safely and easily than transoms. Those who are planning rural schoolhouses would do well to abandon transoms.

CLOAKROOMS.

Every country school should have a special room where children can hang up their wraps and place their lunch baskets in safety and out of the dust and bad atmosphere of the schoolroom. Two cloakrooms, one for the boys and one for the girls, would be better than a single cloakroom for both boys and girls; but, if a single room is properly placed, lighted, ventilated, and heated, it will serve the purpose.

LIBRARY AND TEACHER'S ROOM.

It may be repeated that the school building belongs to the whole community and not simply to the children who are attending school and the teacher who is employed. It is generally the only community property within the district, and, hence, everybody has a right to use it, under proper restrictions, and to make it the general civic center of the community. Practically all district schools throughout the country have or should have some general reference books, and they need decent places to keep these books where they can be consulted readily, easily, and without disturbance. It is not necessary in a small district school to have a large room for the library, but the library room should be made the most beautiful and interesting one in the building. Here little touches of decoration and comfort may appear and an atmosphere of quiet study be suggested.

UNILATERAL LIGHTING.

If the great majority of children were not right-handed, it would be unreasonable to demand that the windows be so placed in schoolrooms as to admit the light from the left side of the pupils when seated at their desks. But, since we are a right-handed race, with brains organized accordingly, the great majority of children are rid of troublesome shadows in writing only when light is admitted from the left side, thus carrying the shadows away from the written work and relieving the vision from the disturbances which would otherwise come. If the reader will take a seat in a closed room near a window and attempt to write with the hand which is next the window, he will realize more fully than words can tell how the shadows of his hand and pen will trouble him. Children suffer more from such disturbances than older people, because their eyes tire more quickly and their attention is more easily distracted. Hence it is a matter of importance to the health and comfort of all right-handed children to be so placed in the schoolroom that light should come from the left rather than from the right.

SANITARY TOILETS FOR COUNTRY SCHOOLS.

What are the essential requirements of sanitary toilets for country schools?

The first requirement is that the toilets be convenient and easily accessible to the children, so that in cold or inclement weather there shall be attached to them no thought of exposure and no feeling of reluctance.

The location of toilets in country schools is a troublesome matter. If they are detached from the school building, they must ordinarily be removed some distance for the sake of both propriety and wholesomeness. But to locate these necessaries outside of the school building is to incur the difficulties connected with inconvenience, bad weather, and the dangers of neglect, and to invite indecent liberties of various sorts. Even when washout or flush toilets are located outside, it is difficult to prevent defilement, rough usage, and unchaste, if not immoral, practices in connection with their use. Although all these results do not necessarily follow outside location, the most rigid supervision is requisite to prevent these outbuildings from becoming insanitary and loathsome.

When dry-vault toilets or those with septic tanks are used, it is best to locate them at a distance from the school building. As these are the only forms of sanitary toilets that the great majority of rural schools will be able to supply, the twofold problem of their location and construction must be considered carefully. The small size of the country school lot makes the problem more difficult. The usual half-acre lot can not well be divided by a hedge or fence into two equal parts, for such division would destroy all possibility of a fairly good playground. On the other hand, unless some screen is introduced, the lack of privacy in the use of toilets during the intermission periods, when they are most used, is serious and indelicate, to say the least. such lack of privacy often causes much reluctance, annoyance, and distress.

The usual locations selected for these toilets are the two opposite corners in the hear of the school lot. Under no condition is it advisable to make a single outbuilding, using one half for the boys, the other half for the girls. The buildings must be well separated. Screens of vines can be used to great advantage in most climates in summer, but as the main part of the school term is in the winter season, in cold climates evergreen shrubs so planted as to shield the buildings and to inclose the walks leading to them are more helpful. In the Southern States the English ivy stands the winters very well and is an ideal vine for covering such buildings and shielding the approaches to them.

Basements afford the most economical and on the whole the best location within the buildings for flush toilets. These can be connected with sewers or with septic tanks elsewhere described.

The second requirement for outside sanitary privies is to construct them in such a manner that the soil around and underneath the school building shall be kept free fro mcontamination. This precaution is necessary on small lots; especially where a well furnishes.

PROCEEDINGS OF THE ASSOCIATION OF SCHOOL COMMISSIONERS AND COUNTY SUPERINTENDENTS.

November 19th and 20th, 1914.

MARYLAND STATE NORMAL SCHOOL BUILDING,
BALTIMORE, MD.

The annual meeting of the Association of School Commissioners and County Superintendents of Maryland met in the library of the Maryland State Normal School Thursday, November 19th, at 10 A. M. In the absence of the President, Mr. James W. Thomas, of Alleghany, State Superintendent Stephens occupied the chair. The minutes of the previous meeting were read and approved.

Superintendent W. J. Holloway acted in Miss Lida Lee Tall's stead in introducing the subject of the new Normal School and its possibilities. The speaker made a strong plea for the introduction of industrial work including Domestic Arts and Agriculture, and such an all around training that would prepare young ladies for leadership in rural communities. Commissioner A. Taylor Smith and Superintendents Wright and McMasters joined in the discussion.

How Physical Defects Hinder the Mental Development of Pupils was introduced by B. K. Purdum. One third of all public school children have been found to be defective. It is estimated that this causes a retardation of one year for every child. That is it requires eight years to do seven years of school work, at a loss to the State of $750,000. The percentage of defects seems to be higher in rural communities than in cities. This splendid paper and the discussion by Andrew J. Pietsch, Assistant Superintendent of Baltimore City, should arouse the school authorities of the State to the introduction of medical inspection in an earnest and effective way.

Definiteness in Teaching Agriculture in Rural Schools was discussed by E. A. Miller, Specialist in Rural Education, U. S. Department of Agriculture. After reading his very excellent paper, Mr. Miller explained his mission in the State of Maryland, to which he has been assigned by the Federal Department for the present school year.

The Chairman appointed the following committees:

Resolutions—Orem, Burroughs, and Ort.

Nominations—Cook, Priee, McVey.

The Treasurer's report showed a balance of $40.50. Owing to the handsome balance shown in the above report Superintendent Cook moved that the payment of dues be deferred for one year.

In the absence of Dr. Thomas H. Lewis, Superintendent Holloway presented the plan of the State Board of Education for giving a Summer School course to such persons as may be appointed teachers after June, 1915, and who are without training and experience. They propose to make use of the new Education Building erected at Ocean City.

A paper by Miss Cora Belle Morse, Supervisor of Music, Cumberland, Maryland, was well received. The chief obstacles as she sees them are untrained teachers and lack of appreciation on part of school officials as well as the general public. She recommends the introduction of victrolas as an aid to teachers in teaching children to appreciate the good things in music.

The following report of the nominating committee was accepted:

President—A. Taylor Smith, Alleghany.
First Vice-President—A. J. Pietsch, Baltimore City.
Second Vice-President—Norris A. Walton, Wicomico.
Secretary—B. J. Grimes, Queen Anne's.
Treasurer—George W. Joy, St. Mary's.
Two Members Executive Committee—J. T. Hershner, Baltimore, and G. L. Palmer, Frederick.

(Signed) *Committee.*

BYRON J. GRIMES,
Secretary.

MEETING OF THE COUNTY SUPERINTENDENTS' SECTION.

November 18th, 1914.

HOTEL RENNERT, BALTIMORE, MARYLAND.

At 10 A. M. the meeting was called to order by the President, W. H. Dashiell. The minutes of the preceding meeting were read and approved.

The Standardizing of School Credits was discussed by Superintendent E. M. Noble, of Caroline. He described briefly their system of giving credits for industrial work done in school and at home. This recognition by the school authorities tends to stimulate and encourage the Corn Club and Canning Club work.

It was suggested by Dr. M. Bates Stephens that the Chair appoint a committee who should consider the discussions and submit a report which should represent the conclusions of this association in regard to the subjects presented. Superintendents McMasters and Phillips were named on this committee.

In the discussion of the Summer School in lieu of the annual Teachers' Institute the Superintendent of Queen Anne's related his experience in making this substitution. He recommended that it be submitted to the vote of the teachers, after a careful presentation of its advantages and disadvantages. The delegation attending Summer School during the summer of 1914 was made up largely of those who were not in the habit of attending Summer Schools. Without exception these teachers reported that they were pleased with the substitution. It will be continued for at least three years.

The Association showed a great deal of interest in the paper by Miss Weer on Home Economics Instruction. She set forth very clearly the aims and the scope of this work.

Miss Mary A. Burnite, State Agent for the Girl's Canning Clubs of Maryland, reported that one hundred and two girls completed the work, canning 28,000 cans of fruit and vegetables. Miss Burnite expects this work to be continued another year and asks the school men to lend it their support.

Superintendent Orem led in the discussion of Promotion Without Examinations, strenuously opposing the change implied in the question.

The report of the Athletic Committee appointed by State Superintendent Stephens at Ocean City last July was made by Superintendent Holloway, of Wicomico. The committee met with Dr. Burdick in Baltimore during the month of September and discussed the possibility of holding an Athletic Meet in each County of the State as a part of the School Rally Day program and sending the winners in these County Meets to a state wide meeting to be held in Baltimore. One very important decision was emphasized, that of basing classes on weight and not on grade. Dr. Burdick has promised to issue a bulletin setting forth the rules and regulations to govern in all the local meets.

The discussion led by Superintendent Edwards on What Can Be Considered in the Way of Professional Training and Experience As the Equal of a Normal School Course evoked much interest. When he mentioned the subject of salaries the whole question was sidetracked into a discussion of the salary law recently enacted and referring to Normal School graduates. Superintendents Garner, Holloway, Wright, and others took an active part in this discussion.

The meeting then adjourned for luncheon with members of State Board of Education.

Byron J. Grimes,
Secretary.

MARYLAND STATE TEACHERS' ASSOCIATION.

OFFICERS AND COMMITTEES, OCEAN CITY MEETING,

June 29th—July 2nd, 1915.

President—Edward F. Buchner, Johns Hopkins University, Baltimore.

Vice-President—Woodland C. Phillips, Savage.

Second Vice-President—John J. Tipton, Cumberland.

Secretary—Hugh W. Caldwell, Chesapeake City.

Treasurer—Dr. Rozell Berryman, Station D, Baltimore.

EXECUTIVE COMMITTEE:

Edward F. Buchner, Baltimore; Woodland C. Phillips, Savage; Edith M. Hill, Hagerstown; William J. Holloway, Salisbury; H. H. Murphy, Glyndon.

STANDING COMMITTEES:

Legislative—M. Bates Stephens, Annapolis; A. S. Cook, Towson; E. W. McMaster, Pocomoke City; F. E. Rathbun, Oakland; Wm. T. Warburton, Elkton.

Resolutions—John E. Edwards, Cumberland; N. Price Turner, Salisbury; Bertha R. Brown, Ellicott City.

Educational Progress—B. K. Purdum, Annapolis; J. Herbert Owens, Havre de Grace; Lera White, Rising Sun.

OFFICERS AND COMMITTEES FOR 1916 MEETING.

President—Wm. J. Holloway, Salisbury.

First Vice-President—E. F. Buchner, Baltimore.

Second Vice-President—John E. Edwards, Cumberland.

Treasurer, Dr. R. Berryman, Baltimore.

Secretary—Hugh W. Caldwell, Chesapeake City.

EXECUTIVE COMMITTEE, FOR 1916.

Wm. J. Holloway, Salisbury; E. F. Buchner, Baltimore City; H. H. Murphy, Baltimore City; G. Lloyd Palmer, Frederick; Andrew H. Krug, Baltimore City.

OFFICERS, GRAMMAR SECTION. FOR 1916.

Miss Anne M. Hyde, Chairman, Frostburg; Miss M. Rose Patterson, Secretary, Roland Park.

SECONDARY EDUCATION. FOR 1916.

Mr. Joseph Blair, Chairman, Sparrows Point; Mr. N. Price Turner, Secretary, Salisbury.

ELEMENTARY EDUCATION. FOR 1916.

Miss Anna Grace, Chairman, Baltimore County; Miss Mary Weagley, Secretary, Westminster.

RURAL EDUCATION AND AGRICULTURE. FOR 1916.

Mr. W. R. C. Connick, President, Baden; Mr. Earl C. Baily, Vice-President, Street; Mr. S. S. Stabler, Secretary and Treasurer, Frederick.

LEGISLATIVE COMMITTEE. FOR 1916.

State Superintendent M. Bates Stephens, Annapolis; Superintendent, E. W. McMaster, Pocomoke City; Mr. Oscar B. Coblentz, Frederick; Mr. Charles G. Myers, Rockville; Miss Mary G. Logue, Baltimore City.

COMMITTEE ON RESOLUTIONS. FOR 1916.

Superintendent Charles T. Wright, Belair; Superintendent Albert S. Cook, Towson; Miss Ida F. Lockard, Westminster.

COMMITTEE ON EDUCATIONAL PROGRESS. FOR 1916.

Assistant State Superintendent B. K. Purdum, Annapolis; Superintendent A. R. Spaid, Cambridge; Miss Margaret Pfeiffer, Ellicott City.

AUDITING COMMITTEE. FOR 1915.

Mr. Edwin W. Broome, Rockville; Mr. Thomas C. Bruff, Towson; Mr. James H. Nichols, Denton.

READING CIRCLE FOR THREE YEARS.

Mr. H. H. Murphy, Baltimore; Superintendent William J. Holloway, Salisbury; Superintendent Nicholas Orem, Easton.

The 48th Annual Meeting was held in Ocean City, June 29, 30—July 1, 2, 1915. The meeting place was the new State Education Building, which was dedicated and formally accepted on Wednesday evening of the Association's meeting. The proceedings of the meeting have been printed and copies sent to all who are enrolled as members. This report is one of the most valuable in the history of the Association and should be read by every teacher in the State. If you are not an enrolled member you should at once send fifty cents to Secretary H. W. Caldwell, Chesapeake City, Md., and procure a copy of the proceedings. It is a good investment even though you failed to get to the Ocean City meeting. It is an indispensable aid in keeping up with what is going on in educational circles in Maryland.

The following paragraph from the preface of the proceedings by the State Superintendent is appropriate here:

"There are certain primary restrictions and requirements which ought to be imposed on every teacher because they affect in a most vital way the character of the work such teacher does. It is the employer's side of the question and the employee, in the freedom and liaitude given in the matter of choice in employing means to discharge his obligations should not have that license which shall leave him free to neglect those basal agencies which are necessary to make his work effective and to discharge those essential duties which his employment involves. Every person who keeps in touch with the work of the Maryland State Teachers' Association, attends its sessions and reads its proceedings is a better teacher because of it, and for the reason this experience brings marked improvement in the character of the work done in the school makes it necessary that teachers should not be left free to employ or reject such means. A State organization of teachers is an imperative need. It affects all teachers and all are morally bound to support it. If voluntary support is not dependable then it should be mandatory and every teacher should be required to become members and School Boards ought to be held responsible for the payments of the annual dues. It is not meant that drastic steps be taken in having teachers live up to the obligations which their chosen profession imposes except in those cases where the exercise of choice may lower professional standards. The Association needs the financial help which such a plan suggests in order to enlarge and extend its program, command more expert knowledge and increase its departments of work. The individual teacher needs the thrill which comes from the

knowledge that she is a part of the organization, the opinions which are contained in the volume of proceedings and the contact with those whose opportunities have been better and whose vision of the work is perhaps larger."

MEMBERSHIP MARYLAND STATE TEACHERS ASSOCIATION.

The records for 1915 shows an enrollment of 720, the membership being distributed as follows:

Allegany County	55	Kent County	8
Anne Arundel County	14	Maryland State Normal	17
Baltimore City	31	Montgomery County	10
Baltimore County	28	Queen Anne's County	11
Calvert County	3	Prince George's County	11
Caroline County	17	Somerset County	8
Carroll County	28	State Board of Education	10
Cecil County	32	St. Mary's County	1
Charles County	5	Talbot County	94
Dorchester County	25	Washington County	8
Frederick County	22	Wicomico County	151
Frostburg State Normal Sch'l	13	Worcester County	20
Garrett County	0	General List	9
Harford County	21		
Howard County	68	Total	720

REPORT OF COMMITTEE ON RESOLUTIONS.

The Committee on Resolutions of the Maryland State Teachers' Association beg leave to make the following report:

1. The association should view with satisfaction an awakened public interest in the public school, as shown by the extraordinary attendance in the several counties on public school exhibit days, conducted for the past year by state and county officials. We believe such occasions have called the public's attention to the most primary need of the state, and will pave the way for a more hearty support of America's greatest social organization—the public school.

2. We desire to place this association on record as favoring better schoolhouses and more wholesome school surroundings. The total valuation on the school property in the counties of Maryland is less than $5,000,000. Since 1910, the state has spent $$14,000,000 on a state road system. We believe the sense of proportion of our people is out of balance, if such is an expression in favor of any public expenditure greater than that given to support a state plan of education. Our school buildings should be built from such approved plans as will insure abundant light and good ventilation, and to this end we recommend that the approval of such plans should be lodged with some State Committee or Board.

3. We would not forget that education is primarily the duty of the home, and the system of teaching cannot be effective unless there is cooperation between school and home. We can render no better service than to make the school more and more the center of the social and intellectual life of the community, and to such an end it is our belief that every school community will evince greater interest in the school, if directly taxed to aid in the erection of the building.

4. We approve most heartily state wide school athletics, as conducted by Dr. Burdick of the Public Athletic League. We thank Dr. Burdick and his assistants for their services in making school athletics popular with our people as well as pupils, not alone for its own merit but also as encouraging better attendance of pupils, more especially in the high school grades.

5. We welcome the quiet but effectual investigation of our school system, through the Maryland School Survey Commission. Enough has transpired already to show that a painstaking and rational inquiry into our schools will arouse our activities in favor of better conditions.

6. We believe the public school should be recognized as distinctively an agency for peace and victories of peace, and to that end we would discourage such military tactics or drills which have for their object training for military service in our public schools.

7. We record our appreciation of the steps now in progress to have Federal aid extended for the encouragement of vocational education. We commend to our school officials the present plan of the United States and the State Departments of Agriculture to vitalize school instruction by suggesting and providing means for applying the abstract knowledge gained from text books. We bespeak for Miss Pritchett, who represents in Maryland this new phase of the work, our co-operation.

8. We recommend to our county school officials the need of a wider and more intensive study of the history and development of Maryland. Teachers' examinations reval a woeful lack of knowledge of our own splendid history.

9. We take pleasure in calling attention again to the increased facilities for teachers training, and bespeak an early day when no one can be employed to teach who has not been professionally trained.

10. We extend our thanks to Dr. Buchner, our able President, Mr. Caldwell, our Secretary, and to the Executive Committee for their successful efforts in presenting the most interesting program, which has been carried out this week to the delight and instruction of all present. We request that the thanks of the association be expressed by our Secretary to the management of the Atlantic Hotel for the use of fur-

niture and the services of the orchestra; to the vestry of the Episcopal Church for the use of the reading desk; and to Messrs. J. G. Harrison & Sons for the floral decorations.

(Signed) J. E. EDWARDS,
N. PRICE TURNER,
BERTHA R. BROWN,
Committee.

REPORT OF COMMITTEE ON EDUCATIONAL PROGRESS.

Mr. President and Members, your committee on Educational Progress begs leave to submit the following report on educational achievement, investigation and experimentation noted recently in both the country as a whole and in our own state.

The educational literature of the year reveals an advance and broadening of great national educational movements as well as a launching of others which are entirely new.

The principle that the administration of public education is the work of a trained expert is beginning to be fully realized,—that a community should not be permitted to have the kind of school that it wants but rather the kind of school which it needs based on the judgment of the trained expert after the proper study.

This point is evidenced by the fact that the city of New York is paying an expert a fee of $10,000 for making a study of overcrowding in the New York school buildings.

The surveys, studies and investigations which have been recently made and are still in progress are in recognition of this principle.

More definite standards of training and experience are being set for those who fill school positions, from the highest paid superintendent down to the teacher with one grade.

It is gratifying to note the development of clear definitions in the minds of school teachers and officials of such common terms as the elementary school, the high school, the college, and the university. These terms are now being generally accepted to apply to separate and distinct steps in the whole process of education.

The importance of State Departments of Education is being more recognized by an increase in their general authority and an extension of their activities.

There is a growing demand throughout the country in states where the district or township has been the unit of administration and supervision for a larger school unit.

No less than half of the states which held sessions of their legislatures during the last year attempted legislation to this end. Many of them copied essentially the county system which had its beginning in Maryland as early as 1865.

The construction of good school buildings in our larger towns and cities is not a new thing, but the neglect of the school plant in the rural community of declining population has been a source of great shame to our American civilization.

We now see many evidences of efforts to improve this condition. A recent report of a joint committee of the National Education Association and the American Medical Association reveals a thorough study of the question, makes sound and sensible recommendations and fixes definite standards not hitherto stated.

Our American education is more fully recognizing the individual differences of school children. This is evidenced by the establishment of special classes for the different types of exceptional children; by the widening of the school curriculum thus increasing the provision for a choice of courses, by the establishment of prevocational courses, departments of vocational guidance, and by the growth of the junior high school.

Industrial education is not only moving forward but the breaking down of the apprenticeship system, the increasing specialization of industry under the factory system and a decline of the function of the home has caused it to broaden as it moves forward.

This broadening manifests itself in the increasing number of trade schools which prepare for industrial efficiency in early life and little else; the pre-vocational school which offers its many courses and which is really a place for "trying out"; the various types of vocational schools of secondary grades preparing for a direct entry into the several vocations; the cooperative school in which the time is divided between the school and the shop; and the continuation schools which provide additional instruction during outside hours after the child has entered a productive occupation.

Your committee notes an increase in the number as well as an increase in the use of definite scientific methods of testing the efficiency of school instruction in terms of actual achievement on the part of the pupil.

In arithmetic we have the Courtis test on fundamentals and the Stone reasoning tests; in spelling we have the Ayres test; in writing the Thorndike and the Ayres scales; in composition the Hillegas and the Harvard-Newton scales; and in reading the Thorndike tests.

These are for the most part, simple and practical and can be used to much satisfaction as well as benefit by any county superintendent.

We find evidences of a wider use of the school plant and an effort to make it more the community center in the passage of a law in New York State requiring the school library to be opened to the people of the community in towns where there are no public libraries; in the removal of town libraries into public school buildings as has been done in several Maryland towns; in the production of 100,000 feet of picture films and 15,000 lantern slides by the University of Wisconsin and their distribution among the schools of 230 towns of the state for use in connection with weekly public lectures given in the school buildings; and the offering by the school board of a New Jersey town of a series of lectures for women on housekeeping and marketing.

Modern discoveries and inventions have completely changed the manner in which our American people live as well as the duties of the individual in our modern society.

Society is consequently making new demands on our public school system from day to day. In order to meet these demands our school people are forced to make numerous experiments.

Under this head we may mention the effort of the city of St. Louis to eliminate useless subjects from the elementary school curriculum and reduce the course to seven years.

Portland, Oregon is trying out a plan by which the teacher passes from grade to grade with her children as they are promoted.

Harrisburg, Pennsylvania has appointed a female advisor for high school girls outside of school hours. Among her duties are consultations with the girls, their parents and employers of girls.

Chicago has increased the work of the high school course to 17 units.

Philadelphia has revised her high school curriculum and relegated several subjects including algebra, hitherto considered indispensable, to unimportant places.

Summer schools for children who failed of promotion have been conducted with success in Boston and Baltimore.

Kindergartens for colored children are being established in the South with the hope of improving social conditions.

Oakland, California and Kansas City, Missouri have established bureaus of testing.

The United States Government is attempting to educate adult illiterates in the South.

The Association of Medical and other professional schools of the country have adopted definite standards equal to graduation from a four year high school for admission.

If the purpose of all of these scattered efforts can be expressed in a single thought, we believe that it is the desire to permit the greatest

possible development of the individual and at the same time further the ends of the larger society.

So far as our state is concerned, you are for the most part familiar with the progress of the last year.

Your committee will consequently mention without going into detail a few things which we feel have made for general advancement.

There was an increase during the last year of more than $600,000 in expenditures for public schools, and an increase of 5 1/10 cents in local school levy for this purpose.

There was an increase in total enrollment of 6,747 pupils and in percentage of attendance of 1/10 of 1%.

The work of the State Survey Commission has progressed with satisfaction and the field work has been completed.

Public school exhibit days have been held in most of the counties. They have been largely attended and we believe have promoted universal interest in public education.

Boys' Corn Clubs and Girls' Canning Clubs have been organized in a number of counties.

Under the direction of the Public Athletic League there has been a very wholesome development of school athletics.

There has been an extension of our permissive compulsory school attendance law to several additional counties.

A few counties have taken up the medical inspection of school children under the provision of a recent act of the legislature.

The importance of properly trained teachers as a factor in an efficient school system finds recent recognition in a further increase in the minimum salaries of Normal School graduates or the equivalent in training; the great increase in the number of teachers who attend summer school; a provision in our law for the establishment of teacher training courses in high schools; fixing completion of two years high school work as the requirement for admission to the Normal Schools; in an increase in the maintenance appropriation of all the Normal Schools; in the erection of the finset and most modern, though not the most extensive, Normal School plant in the whole country; and finally the erection by the State of this State School Building and its dedication to the sacred trust of the Maryland school people.

(Signed) B. K. PURDUM, Chairman.
LERA WHITE,
J. HERBERT OWENS,
Committee.

EXCERPTS FROM REPORT ON HOME DEMONSTRATION AND GIRLS' CLUB WORK IN MARYLAND.

Home Economics Extension Movement was made possible by an act of Congress, May, 1914, known as the Smith Lever Act. In this act, the National Government responded to a wide-spread demand throughout the country for extension work in Agriculture and Home Economics. The work is conducted by the United States Department of Agriculture cooperating with the land grant College of the State. The purpose of the Home Economics movement is to carry to the girls and women of the rural districts, instructions in Home Economics and allied subjects.

This work was begun in Maryland under its present organization by Katharine A. Pritchett, May 1st, 1915, with headquarters at Maryland Agricultural College, and up to September 20th six counties had been organized.

Miss Florence J. Hunt, of the Home Economics Department of Illinois University, entered the work as Assistant State Agent, July 12th, 1915.

The work began with the organization of Girls' Clubs. Canning, Vegetable Gardening and Sewing being the most important activities. The canning demonstrations were accompanied by illustrated talks on sanitation, the fly being the particular object of the illustration.

Until September 25th, the clubs met at the homes of the club members, in grange halls, church parlors and community halls; but, owing to various factions in the State, mainly religious and political, we found it undesirable to have clubs meet at the homes of the members. In order to overcome this objection we appealed to the State Board of Education for the use of the schools as a center of organization for the Girls' Clubs. Dr. Bates Stephens, State Superintendent of Education, not only offered us the use of the schools as a place of meeting but encouraged the County Superintendents to cooperate with the Home Demonstration movement in every way possible. This has been done with the exception of one county. Since September 25th we have been organizing the clubs and giving instruction in the class rooms. By so doing, we are securing a neutral meeting grounds, are gaining the cooperation of a recognized organization, the school, are enlivening the school curriculum, and by inviting the girls living in the school district but not attending school to join the Girls' Club we are continuing their education and their interest in the school. All work given in the Girls' Club is correlated with the school subjects.

Since November 20th, four counties have expressed their desire for the work. Two are in a financial position to meet their part of a county agent's salary. Two are not. One of these two, Charles

County, hopes to have the money before the work begins in the spring. Several of the School Boards are including the county's part of the county agent's salary in their next year's budget.

County Agents conference was held at the Maryland Agricultural College July 27-28th. Five agents were present. Lectures were given by the State Agent and the Assistant State Agent, but the most interesting feature of the conference was the canning demonstration given by Miss Ola Powell, Department of Agriculture.

Three counties will continue their work throughout the year, namely, Kent, Harford, and Allegany.

WOMEN'S WORK.

Women are more conservative than the girls in receiving the work. In most cases they feel it an intrusion for a County Agent or a State Agent to offer suggestions concerning a more efficient way of managing their homes. So far, I have found it better to interest an organization which is engaged in literary or social activities, to give one meeting each month to Home Economics work rather than attempt to organize a home demonstration club.

Work that we hope to put on the field this winter for women will be as follows:

Correspondence Course—(Beginning January 1st, 1916.)

Movable Schools—(In session from three to five days.)

Study Courses—(Here we meet with the club once or twice a month giving definite instructions on a desired subject for four or five months.)

Short Course—(Maryland Agricultural College, January 10-15.)

As follow-up work, two women's clubs are taking short courses, meeting one a month. The movable schools have been requested for January and March respectively. Three single lectures have been requested.

The Woman's Federated Clubs of Maryland are most anxious to cooperate with the Home Demonstration movement. At my suggestion, they are planning a movement to bring about a better community spirit throughout the counties by encouraging the club of one county to invite a club of a neighboring county to its monthly meeting. They are also encouraging the various county clubs to embody home demonstration work in their programs.

The women of the State take very kindly to the scientific side of the work. A Grange on the Eastern Shore has called for a course in "Chemistry of Household Reagents."

MARYLAND STATE NORMAL SCHOOL, TOWSON.

REPORT OF THE PRINCIPAL, MISS SARAH E. RICHMOND.

November 1, 1915.

DR. M. BATES STEPHENS,
Secretary State Board of Education,
Annapolis, Md.

DEAR SIR:—I herewith submit my report for the Maryland State Normal School.

During the scholastic year ending July 31, 1915, 331 students were enrolled in the Normal School, and 54 in the Model School, the smaller number in the latter school being due to its expected removal to another locality. In June, 79 students received diplomas. As far as known all are now teaching.

I am glad to report that the student body has shown the same earnestness of purpose which has characterized it hitherto. The Principal and critic teachers of the Model School have commented upon the greater zeal, the improvement in methods of teaching, the increased self-reliance in handling classes and maintaining the discipline thereof, of each succeeding class sent into the training school for practice preparatory to assuming entire control and management of classes and schools after graduation.

While scholarship is recognized in the Normal School as one of the chief essentials of an instructor, yet emphasis is laid upon the spirit of the teacher and her capability to successfully adjust herself to new requirements, whether they be in the course of study, methods of teaching or discipline, or in local conditions.

The raising of the entrance requirements for admission into the Normal School—the completion of a two years' course in an approved high school—has tended to lessen the number of students in our First Year classes, and to raise the number in our Junior classes composed of graduates of approved high schools.

This change in requirements necessitates a change in our course of study, especially in our Academic classes. Under the new conditions it is not self-satisfying. The demand for something new is not unreasonable and should be met by us in a way satisfactory to the student and progressive to the school.

In our new situation and with our additional facilities we are able to so enlarge our curriculum as to broaden the scholarship of our students, and help them to become true and helpful social workers in the communities where they are sent.

Equal opportunity is not afforded all until opportunity is given to each to develop that which is her dominant characteristic. In the present age when the consolidation of schools is constantly urged, the one-room school will eventually disappear and with it will disappear the necessity of our teachers knowing a little of every subject and therefore not learned in any. Shall we not show forethought in our Normal School and give students an opportunity to specialize in certain directions?

Since my last report the Maryland State Normal School has marked an epoch in its history. It has changed its home from the dust and noise of the city to the quiet and wholesome air of the country. The building at Lafayette Square—the home of the school for forty years and from which had gone out nearly 2500 students to teach in the city, suburban, and rural schools of the State—has been vacated and the school removed to Towson.

The removal to our present location was not attended without difficulty. The adjustment of a large plant, power-house, laundry, dormitories, and administration building—with the increased machinery and force of employees that it may work easily and smoothly, was not an easy task. Had it not been for the watchful supervision and the constantly able help given by the Assistant State Superintendent the Principal doubts if the organization of all the forces into a unit would have been so completely and so soon effected.

Beatiful in situation is our new habitation. Surely the quiet, the beauty of the environment, the large acreage, the magnificent plant, cannot fail to put new life into both students and teachers inciting them to loftier purpose and greater undertakings.

Well do we realize that it is not the outward plant, nor the apparatus, nor the library that makes a school. The two dominant factors are teacher and student. The one possessed by high ideals accompanied by study, investigation, persistence, common sense and a love for mankind; the other actuated by right motives in seeking the school, desiring to profit by each hour's instruction, making the best of every opportunity and consecrating himself to his work as a true patriot to his country's cause—these are the spiritual principles underlying every school whose work permeates every community for good and makes that school worth while.

FACULTY AND GRADUATING CLASS, 1915, MARYLAND STATE NORMAL SCHOOL

FROSTBURG STATE NORMAL SCHOOL,

FROSTBURG, MD.

REPORT OF PRINCIPAL EDWARD F. WEBB.

NOVEMBER 25, 1915.

DR. M. BATES STEPHENS, *Secretary,*
State Board of Education, Annapolis, Md.:

MY DEAR SIR—I herewith take great pleasure in handing you the report of the Frostburg State Normal School for the year 1914-1915.

In making this report, I am gratified to make some comparisons and possibly to draw some conclusions or make some suggestions, as a result of the growth of the school during the past four years, as shown by the following figures compiled from the records of the scholastic year 1911-1912 and the year 1915-1916.

The comparative enrollment is as follows:

	1911-12	1915-16
Senior Class	14	39
Junior Class	22	71
Sophomore Class	14	34
Freshman Class	28	49
Totals	78	193

The enrollment will be seen, in the two upper classes, where we have put forth our greatest effort, to have increased during the four years something over 300 per cent. While this growth is measured purely from a physical standpoint, and while it is impossible to make a similar comparison of the efficiency of our graduates; we believe, we have sufficient evidence from the superintendents of the counties, where by far the greater number of graduates teach, to warrant the statement, that they are thoroughly prepared both from an academic and professional standpoint, for the the work in our public schools throughout the first eight grades.

Our Model Department is now a thoroughly organized eight-grade public school, housed in a four-room building furnished by the State, with 30 pupils to the room. Our professional students during the Junior year observe the teaching both of the Model teacher and the Senior student teacher working under the supervision of the Model teacher and a special criticque teacher. During the Senior year each student who graduates, teaches one period a day for 20 weeks, under

the direction of the Model teacher supervised by the critieque teacher, the practice work being distributed over the eight grades as far as it is advisable. We do not mean to say in the above statements, that our work is perfect; for we are striving to have it grow day by day in keeping with the advance in modern educational methods.

Here we wish to make a suggestion, one we believe to be entirely practical under the existing system of transporting pupils. Our suggestion is this, that since such a large proportion of Maryland teachers are engaged in rural work, and since we further believe and hope that the time is fast approaching, with the great improvement in our rural communities, when conditions, including salaries, will be such that the position of the rural teacher will, at least, be equally as attractive as that of the town teacher. With the above in mind, we would like to have added to our plant a modest one-room school building, in which a Model rural teacher shall teach the pupils from a one-room rural district, said pupils being transported from district in which they would naturally attend school, so that our graduates, whom we urgently advise to teach in the one-room school, where we believe them to grow in principles of school management and in the formation of a self-reliant character, thus giving or developing in them traits that they can never form as an assistant teacher; where our graduates as said before, may have the advantage both of seeing a one-room school in operation, and where they may teach under the supervision of a critieque teacher. This would give them the same training in rural school work as they are now getting in the grade work. I would like to add that I think this one-room building from an architectural and sanitary standpoint should be in a modest way a model one-room building.

A second suggestion we wish to make is—that, since we are averaging about twenty boarding students per year, and believe we would have more under proper conditions, as parents do not wish to place their daughters in boarding houses at the tender and critical age of the average normal school student; that a modest dormitory be added to our plant, where students could board and be under the supervision of our teachers. We are now receiving from the State $10,000, this added to the interest on their investment of $50,000, at 6 per cent., makes a total cost of maintaining the school per year $13,000. We do not believe there is a school in the State, supported by the State, that is giving a greater dividend on the money invested, nor do we believe there is another school in the State doing the secondary work that we are doing that is not equipped with a dormitory. We further believe the greatest argument in favor of the dormitory is the promptness with which the new dormitories connected with the new plant of the Maryland State Normal School, near Towson, were filled.

We have now the painful duty of reporting the death of one of our highly esteemed and dearly loved members of our faculty, Dr. Samuel Adam Baer, instructor of pedagogy, whose worth as an educator in this community will long outlive the memories of the man.

I do not feel that I would be doing our faculty and student body justice in closing without mentioning the splendid atmosphere of our school, born in the respect and confidence of our pupils for the members of the teaching corps, on the one hand, and appreciation of this idea by the teachers on the other hand.

Again let me express our most hearty appreciation of the interest taken in and the support given our institution by the members of the State Board of Education.

Yours very respectfully,

EDWARD F. WEBB,
Principal.

ANNUAL REPORT MARYLAND NORMAL AND INDUSTRIAL SCHOOL.

(FOR COLORED STUDENTS.)

BOWIE, MD.

REPORT BY D. S. S. GOODLOE, Principal.

OCTOBER 22, 1915.

The Honorable State Board of Education of Maryland,
Annapolis, Md.:

GENTLEMEN—I have the honor to report that school opened here on the 22nd of September with an increased enrollment over that of last year. In fact the school, with its present facilities, ought not attempt to accommodate more. We have now a more mature and better prepared body of students, than has been the case at any time since school opened in the fall of 1911. Therefore, we are able to reasonably demand and expect a higher and better type of classroom work and results.

It is significant, that not a single student has as yet entered with adequate training in Elementary and Grammar School English. Perhaps better results might be obtained if the county superintendents insisted or demanded that more stress be placed upon the teaching of this branch in the public county schools for negroes.

I respectfully and earnestly suggest that modest facilities be provided here for training in two or three of the fundamental industries, for it seems to me to be evident that it is necessary to do so, if we are to continue to help, and fit for service, the class of male students this school seeks to train. I refer particularly to carpentry and blacksmithing. Perhaps shoemaking and shoemending ought to be included. I think this school ought to have its share in producing the manual training teachers and supervisors of negro rural schools, for which the laws of the State provide.

I respectfully call attention to the insufficiency of our present water supply, which continually becomes more serious. The solution of this difficulty can be found in the driving of an artesian well or the building of a large capacity cistern.

It is pleasing to note that no resignations from the faculty of last year have occurred and the spirit of co-operation appears to leave nothing to be desired in that respect.

Enrollment 1914-1915—First year Normal Department, 26; second year Normal Department, 11; third year Normal Department, 7; Preparatory Department, 14; special students, 2. Total, 60.

Graduating Class: Samuel J. Bascerville, Julia M. Boyd, Carrie D. Chambers, Mamie R. Patterson, Murray R. Posey, Wm. B. Tildon, Eva B. Tittle. Of these seven graduates, six are teaching in the public schools of Maryland. One is a freshman at Lincoln University, Pa., and expects after further preparation to make teaching his profession.

Faculty.

D. S. S. Goodloe, A. B., Principal—Psychology, Pedagogy and School Management.

Mrs. D. S. S. Goodloe, A. B., Matron—Music.

J. Thomas Williams, Vice-Principal—Mathematics.

Earnest O. Berry, A. B.—Science and Language.

Ruth Tuell, A. B.—History and Language.

George Smith—Agriculture.

Ella Catherine Garner—Domestic Science.

Respectfully submitted.

D. S. S. Goodloe,
Principal.

STATE TEACHERS' READING CIRCLE.

ORGANIZATION.

Acting under the authority conferred by the laws of 1890, Chapter 323, giving the Maryland State Teachers' Association power to organize, manage and direct a State Teachers' Reading Circle and adopt therefor a course of study in pedagogy, general literature, etc., the Maryland State Teachers' Association has appointed the following Board of Managers:

Dr. M. Bates Stephens, State Superintendent of Public Education, Annapolis.
Miss Sarah E. Richmond, State Normal School, Baltimore.
Mr. B. K. Purdum, Assistant Superintendent of Education, Annapolis.
Mr. H. H. Murphy, Principal High School, Reisterstown.
Miss M. M. Robinson, Western Maryland College, Westminster.
Mr. W. J. Holloway, Superintendent of Schools, Salisbury.
Mr. Nicholas Orem, County Superintendent of Schools, Easton.
Mr. John E. Edwards, County Superintendent of Schools, Cumberland.
Miss M. W. Tarr, State Normal School, Baltimore.

This Board is to manage and direct the State Teachers' Reading Circle and to carry out the provisions of the above act. The Board of Managers is organized with Dr. M. Bates Stephens, *ex-officio*, chairman, and Miss M. W. Tarr, secretary.

CERTIFICATES AND TESTIMONIALS.

Certificates, countersigned by the chairman and secretary of the Board of Managers, are granted to those members who, having completed one year's work, present satisfactory evidence of having thoroughly and thoughtfully read the books assigned. This evidence is presented in the form of themes, written in accordance with requirements issued by the Board, and which may be had upon application to the secretary.

Testimonials, countersigned by the secretary of the State Board of Education and the secretary of the Board of Managers, are awarded by the State Board of Education to all members who have satisfactorily completed three years of Reading Circle work, and who are

recommended for this honor by the Board of Managers. By vote of the State Board of Education, those desiring Teachers' Life Certificates may offer these testimonials in lieu of the required examination in the professional subjects and they will be accepted.

ASSISTANCE.

The Board of Managers desires to be as helpful as possible to the teachers of the State. Members of the Reading Circle desiring information or advice at any time on any of the subjects of study are invited to direct their communications to the secretary of the Board of Managers named above, and she will refer it to the one appointed to have special oversight over that subject of study to which the matter belongs.

MEMBERSHIP.

All teachers of Maryland and all persons above the age of 18 years are eligible to membership. An annual membership fee of 25 cents is required in order to meet the necessary expenses of the organization. Its payment entitles the member to a membership card, to all sylabi and information relating to the courses, that may from time to time be sent out by the secretary, and to a certificate after satisfactory evidence of work done has been presented to the Board of Managers. Membership cards may be obtained from the county secretary or from Miss Tarr.

COURSES OF STUDY.

There are four courses of study outlined for the year 1914-1915—one major course, Pedagogy, and three minor courses, Literature, History and Science. Every member who wishes to receive the certificate of the Board of Managers for 1914-1915 must take the major course, Pedagogy, and in addition, one of the minor courses—Literature, History or Science—prescribed for 1914-1915.

REQUIRED READING FOR 1915-1916.

Pedagogy.—Parker's "Methods of Teaching in High Schools," published by Ginn & Co., N. Y. Price, single copies, $1.20 postpaid; in lots of 10 or more to one address, $1.08 per copy, transportation paid. Or—

Earhart's "Types of Teaching," published by Houghton, Mifflin Company, N. Y. In quantity to one address, $1.00 per copy, express unpaid; single copies postpaid for $1.08.

Science.— Cromwell's "Agriculture and Life," published by the J. B. Lippincott Co., Philadelphia. Ten or more copies, 90 cents per copy, express prepaid; single copies, $1.00, postpaid.

History.— Wayland's "How to Teach American History," published by Macmillan Co., N. Y. Single copies, postpaid, 99 cents; in lots of 10 or more, carriage paid, 88 cents.

English.— Turner's "Teaching to Read," published by the American Book Co., N. Y. Single copies, $1.00, postpaid; 10 or more copies, 90 cents each, charges paid.

PURCHASE OF BOOKS.

The required books may be obtained at the office of the County Superintendent, at the book stores in Baltimore, or from the publishers.

Wherever possible members are advised to purchase their books through the superintendent of their county, as books so purchased can frequently be obtained at lower prices than those quoted above.

THE PRESCRIBED WORK SINCE REORGANIZATION IN 1901.

1901-1902.

Hinsdale's "Art of Study."
Barrett Wendell's "English Composition."
Shakespeare's "Julius Caesar" and "As You Like It."
Scott's "Nature Study and the Child."

1902-1903.

White's "The Art of Teaching."
Matthew's "Introduction of American Literature."
Lowell's "Vision of Sir Launfal" and "Commemorative Ode."
Hodge's "Nature Study and Life."

1903-1904.

Shaw's "School Hygiene."
Bliss Perry's "A Study of Prose Fiction."
Scott's "Ivanhoe."
Andrew's "Botany All the Year Round."

1904-1905.

McMurry's "The Method of the Recitation."
Bliss Perry's "The Study of Prose Fiction."
George Eliot's "Silas Marner."
Andrew's "Botany All the Year Round."

1905-1906.

James' "Talks to Teachers."
Thackeray's "Henry Esmond" and "Vanity Fair."
Fiske's "Critical Period in American History."
Ball's "Starland."

1906-1907.

Seeley's "History of Education."
Chubb's "The Study and Teaching of English."
Hart's "Source Book of American History."
Hielprin's "The Earth and Its Story."

1907-1908.

O'Shea's "Dynamic Factors in Education."
Chubb's "The Study and Teaching of English."
Bryant's "How to Tell Stories."
Sparks' "The Men Who Made the Nation."
Hodge's "Nature Study and Life."

1908-1909.

Bagley's "Classroom Management: Its Principles and Technique."
Colby's "Literature and Life in School."
Browne's "Maryland. The History of the Palatinate."
Wright's "The Citizen Bird."

1909-1910.

Bagley's "The Educative Process."
Heydrick's "How to Study Literature."
Shakespeare's (a) "Merchant of Venice," (b) "Hamlet."
McMurry's "Special Method in History."
Johnston's "The Problem of Adapting History to Children in the Elementary Schools."
Allen's "Civics and Health."

1910-1911.

McMurray's "How to Study and Teaching How to Study."
Coman's "Industrial History."
Fisher and Cotton's "Agriculture for Common Schools."
Seward's "Narrative and Lyric Poems for Students."
Heydrick's "How to Study Literature."

1911-1912.

(a) Briggs and Coffman's "Reading in the Public Schools," (b) Kirkpatrick's "Fundamentals of Child Study."
(a) Bruce's "Daniel Boone and the Wilderness Road," (b) Coman's "Industrial History."
Arlo Bates' "Talks on Writing English," Second Series.
Sutherland's "Teaching of Geography."

1912-1913.

Strayer's "A Brief Course in the Teaching Process."
Johnston's "High School Education."
Lecky's "The American Revolution."
Esenwein's "Writing the Short Story," and Cody's "The World's Greatest Short Stories."
McKeever's "Farm Boys and Girls."

1913-1914.

Gilbert's "What Children Study and Why."
Andrew's "The Colonial Period," and Jacobs' "Story of Geographical Discovery."
Gwynn's "Masters of Literature."
Gillette's "Constructive Rural Sociology."

1914-1915.

Carney's "Country Life and the Country School."
Holmes' "Principles of Character Making."
MacDonald's "From Jefferson to Lincoln."
Carpenter, Baker and Scott's "The Teaching of English."
Terman's "The Hygiene of the School Child."

CERTIFICATE REQUIREMENTS FOR THE COURSE OF 1914-1915.

Caution—Read the directions before writing, and follow them carefully and fully.

SUGGESTIONS.

Those submitting themes are requested to follow these suggestions:

1. Write the name and address of the writer at the top of the first sheet of each theme.

2. Write only on one side of the paper.

3. If possible, use paper about eight inches by ten inches in size.

4. Leave a margin at least an inch on the left, for the notes and criticisms of the reviewer.

5. Stress will be laid upon the proper use of capitals, punctuation marks, paragraphing and correct grammatical expression.

6. Themes must show that the author's views have been assimilated by the writer. No paper will be accepted that is a verbatim report or reproduction of the book assigned for reading.

7. Do not roll or fold your manuscript. Mail it flat.

8. Criticisms, when they appear, are made with the hope that they will be accepted in the spirit in which they are written, and that they will prove helpful to the writer of the theme. It is hoped that the criticism will be carefully noted and that the reader will earnestly strive to correct the faults.

9. All themes should be handed in not later than September 1, 1915. The Secretary will return rejected themes to the writer by November 1, to be rewritten if the writer so desires. All themes will be returned to the writer by December 1, 1915.

Pedagogy.—Choose (a) or (b):

(a) "Country Life and the Country School," by Mabel Carney. Published by Row, Peterson & Co., New York. Price, $1.00 to teachers or 90 cents in lots of ten or more copies, transportation charges prepaid.

In the appendix to the book—pages 329 to 336, inclusive—you will find the subject matter of Country Life and the Country School outlined under four parts.

Requirements: Write one theme between 2500 and 3000 words in all, on the content as outlined under

Part I—

1. Improving the physical environment of the school;
2. Socializing the country school and making it a community center;
3. Vitalizing and enriching the course of study;
4. Better organization and management (omitting d);
5. Consolidation (omitting e);
6. The local leadership of the country teacher. And

Part III—Agencies for the solution of the farm problem;

1. Socializing institutions; using A; B; D, a; E, a. Or

(b) "Principles of Character Making," by Arthur Holmes. Published by Lippincott Co., Philadelphia. Single copies, $1.00, postpaid.

Requirements: Write a theme—length about 3000 words—using the thought as contained in the chapters and topics named below:

Chapter III. Discuss (a) heredity and environment in forming character; (b) the ability of the teacher to develop hereditary potentialities in every child.

Chapter V. The wisdom in exercising judicious and timely tact.

Chapter VI. Habits, their establishment, physical basis, formation, different stages of habit making, habit breaking.

Chapter VII. Play: The different theories regarding play, its quickening power, its value: See also Chapter XII.

Chapter IX. The Will: (a) Discuss—using illustrations—"What a man thinks, that he will do." (b) Show that a knowledge of the laws regulating ideas is important to teachers.

Chapter X. Show the different phases of the period of adolescence, and the value of a knowledge of these phases to the trainer of youth.

Chapter XI. Contrast true morality with conduct.

Chapter XII. Discuss: Moral training as contained in this chapter.

Science.—"Hygiene of the School Child," by Terman. Published by Houghton, Mifflin Co., New York. Single copy, postpaid, $1.32.

Write a paper of from 1500 to 2500 words, discussing the following topics:

I. Conservation of child life.
   (a) As a factor in determining the future of the race.
   (b) As an economic problem.

II. The relation between the physical and mental condition of the child and its bearing upon what we should attempt to teach in school.

III. Malnutrition in school children.
   (a) Prevalence.
   (b) Causes.
   (c) Detection.
   (d) Responsibility of school authorities.

IV. Five common physical defects of school children, method of detecting each, and their bearing on the progress of the child in school work.
   (a) Defective teeth.
   (b) Defective vision.
   (c) Diseased tonsils.
   (d) Adenoids.
   (e) Defective hearing.

V. Medical inspection of school children.
   (a) Opportunities of the teachers in supplementing the work of the school physician or nurse.
   (b) What can be accomplished by the teacher in the absence of medical inspection.

VI. Possibilities of the school as a factor in the national fight against tuberculosis.

English.—"The Teaching of English," by Carpenter, Baker and Scott. New Edition. Published by Longmans, Green & Co., N. Y. Single copy, $1.12, postage additional; in lots of ten or more, $1.10, carriage prepaid.

Write on one or more of the subjects given, the paper or papers to total not less than 2500 words:

1. Teaching the mother tongue—
   a. Importance of such instruction.
   b. What the mastery of one's language involves.
   c. Difficulties to be overcome.
2. Literature in the elementary school—
   a. Value of it.
   b. Kinds best adapted to elementary pupils.
   c. Best way to teach it to such pupils.
3. The need of formal grammar and when and how it should be taught.
4. Rhetoric and composition in the secondary school.
   a. Amount of formal rhetoric necessary, its place in the course, and the method of teaching it.
   b. Amount of composition to be done, kind of composition and the correcting of themes.
5. How to secure the best results from the teaching of literature in the secondary school.
6. The teaching of English throughout the elementary and the secondary school according to a graded and unified course and by thoroughly trained teachers well adapted to the work.

History.—"From Jefferson to Lincoln," by William MacDonald. Published by Henry Holt & Co., New York. One to ten copies, 45 cents, prepaid; ten or more copies, 42 cents, prepaid.

Write an essay upon the subject, "Steps toward Disunion." The essay is not to contain less than 1000 words or more than 1500 words. Discuss the weakness and strength of such acts as the Missouri Compromise, Compromise of 1850, Dred Scott Decision and Kansas-Nebraska Act.

Give enough thought to the reading of the text to enable you to express the matter of the essay in an original verbal form, and do not depend upon many verbatim quotations from the book.

Address: MISS M. W. TARR, *Secretary*,
Maryland State Normal School, Towson.

EXTRACTS FROM SECRETARY'S FOURTEENTH ANNUAL REPORT.

The following extracts from the Secretary's fourteenth annual report of the Maryland State Teachers' Association will be of general interest.

The records for the year 1914-15 show an enrollment of 1,048, distributed as follows:

Allegany	128	Howard County	47
Anne Arundel	0	Kent County	76
Baltimore County	36	Montgomery County	0
Calvert County	7	Prince George's County	42
Caroline County	164	Queen Anne's County	0
Carroll County	114	St. Mary's County	0
Charles County	1	Talbot County	35
Dorchester County	118	Somerset County	6
Frederick County	33	Washington County	54

CERTIFICATES AWARDED.

During the year the following persons have had one year's course of reading and have been awarded certificates by the Board of Managers:

Course of 1913-14.

Baltimore County.

Grace Bacon.

Caroline County.

A. C. Brower
Ethel P. Cade
Elsie M. Cleary
Mary Cooper
Mary E. Davis
M. Edith Dill
Lillie E. Doty
Elizabeth S. Dukes
Myrtle M. Dukes
Addie C. Gale
Mary Moore Garey
S. Grace Greenlee
Mable Knotts
Lora A. Lynch
Alice E. Mason
Stella M. Matthews
Laura Melvin
G. O. Mudge
Dora Noble
Cora M. Pippin
Caroline P. Redden
M. Elise Roe
Rebecca Satterfield
M. Ella Shockley
Bertha S. Shull
Ursula Slaughter
May Thompson
Addie L. Wilson
Eva Wright

Queen Anne's County.

Mary J. Vansant

Wicomico County.

Minnie E. Anderson
Addie E. Bennett
Mary J. Bennett
Myra A. Bennett
Ella Lee Betts
Lulu B. Bounds
Allen Carlson
Mattie F. Culver
Marian S. Davis
Lettie G. Gossett
Arthur L. Greenwood
May Hamblin
Mamie Hastings
E. Vaughan Jacobs
Gertrude Killiam
Mary E. Mann
Ira Morris
Blanche Owens
Edna Owens
Mattie E. Parker
Mollie L. Parker
Beulah Elizabeth Perdue
Stella M. Richardson
Amy Grace Robertson
Anna M. Sheppard
Belle Jackson Smith
Nancy H. Smith
Morris L. Stier
Mabel Eugenia Waller
Evelyn Walter
Susie A. Willing
Lula E. Wright

Worcester County.

John S. Hill

TESTIMONIALS AWARDED.

The following persons having completed a three years' course of reading, and having met the requirements of the Board of Managers, have been awarded testimonial diplomas:

A. C. Brower	Caroline County
Lillie E. Doty	Caroline County
Mary Moore Garey	Caroline County
S. Grace Greenlee	Caroline County
G. O. Mudge	Caroline County
M. Elise Roe	Caroline County
Rebecca Satterfield	Caroline County
Ursula Slaughter	Caroline County

Miriam J. Vansant	Queen Anne's County
Mattie F. Culver	Wicomico County
Mamie Hastings	Wicomico County
Ida Morris	Wicomico County
Mattie E. Parker	Wicomico County
Belle Jackson Smith	Wicomico County
Morris L. Stier	Wicomico County
Lillie Wiener	Frederick County

During the year the Reading Circle has been under the management of the following officers:

Dr. M. Bates Stephens, *ex-officio*, Chairman, Annapolis, Md.

Miss S. E. Richmond, State Normal School, Baltimore, Md.

Mr. B. K. Puddum, Assistant Superintendent of Education, Annapolis, Md.

Miss M. M. Robinson, Western Maryland College, Westminster, Md.

Mr. Edward M. Noble, County Superintendent of Schools, Denton, Md.

Mr. Nicholas Orem, County Superintendent of Schools, Easton, Md.

Mr. John E. Edwards, County Superintendent of Schools, Cumberland, Md.

Mr. H. H. Murphy, State Normal School, Baltimore, Md.

Miss M. W. Tarr, Secretary, State Normal School, Baltimore, Md.

At a meeting of the Board of Managers held May 22, Mr. E. M. Noble resigned as a member of the Board. Mr. Wm. J. Holloway, Superintendent of Schools of Wicomico, was elected to fill the unexpired term of Mr. Noble.

As the terms of three members expire at this time—Mr. Orem, Mr. Murphy, and Mr. Holloway—it is necessary for the Association to appoint their successors.

At a meeting of the Board of Managers held July 1, 1915, the Auditing Committee reported that it had examined the accounts of the Treasurer for the period beginning June 26, 1914, and ending June 30, 1915, and found the same correct. The receipts, disbursements, and balances are as follows:

RECEIPTS:

June 26, 1914, Balance on hand	$ 895.64
June 26, 1914 to June 30, 1915	295.43
	$1191.07

DISBURSEMENTS.

June 26, 1914 to June 30, 1915	$ 235.52
June 30, 1915, Balance on hand	955.55
	$1191.07

NICHOLAS OREM,
B. K. PURDUM,
Auditing Committee.

Respectfully submitted,
M. W. TARR, Secretary.

THE 1915 SUMMER COURSES OF THE JOHNS HOPKINS UNIVERSITY.

DR. EDWARD F. BUCHNER, Director.

The fifth session of the summer courses at the Johns Hopkins University, during the six weeks from July 5th to August 12th, 1915 was the largest and best that has been held at the University. The characteristics which annually marked the increasing success of the preceding sessions from the point of view of the accomplishments by the students and from the point of view of the work of the instructors, led to a considerable extension of, and addition to, the plans for the work in 1915. Appreciating the many requests from teachers for opportunities to carry on advanced work that would be serviceable to those engaged in teaching in high schools, normal schools and colleges, the university authorities extended the policy of these courses so as to include graduate instruction. In planning these additions and extensions as well as those bearing upon elementary education, the cooperation of state, county and city superintendents was helpful in determining the content of the courses which should be offered. This spirit of cooperation has not only marked the work from its inception, but has become an increasingly vital part of the attitude of students and teachers throughout the sessions.

Courses were announced in the eighteen subjects of Biology, Chemistry, Domestic Science, Domestic Art, Education English Composition and Literature, French Language and Literature, German Language and Literatures, History, Latin, Manual Training, Mathematics, Physics, Playground and Recreation, Politics, Psychology, and Spanish. The wide range of work made available in the seventy courses arranged, in these subjects, can be indicated only by a complete list of the courses. They were: Botany, Zoology, Organic Chemistry, The Principles of Analytical Chemistry, Inorganic Reactions and Inorganic Preparations, Quantitative Analysis, Household Chemistry, Introduction to General Chemistry, Elementary Cookery, Advanced Cookery, Methods of Teaching Domestic Science, Elementary Clothing and Hand Work, Drafting, Draping and Costume Design; The Administration of Secondary Education, Adolescence, Secondary School Teaching, Principles of Education, The Grammar Grades of the Elementary School, the The Primary Grades of the Elementary School, The Teaching of English and History in the Elementary School, The Teaching of Arithmetic and Geography in the Elementary School, Rural School Problems, A Rural Demonstration School, The Principles of Elementary Teaching, School Management and School Law; Description and Narration, Expository Writing, Sentence and Paragraph Structure, Elements of English Com-

position; English Literary Movements of the Present, the Poems and Dramas of Tennyson, The Poems and Dramas of Browning, Anglo-Saxon; French Romanticism, Readings in French, Elementary French; Goethe's and Schiller's Later Classical Dramas, Origin and Development of Modern German, Advanced German, Readings in German, Elementary German; Latin-American History and Diplomacy, American History (2 courses), English History (1485-1688), Roman History; Tacitus (Annals), Cicero; Elementary Manual Training, Bench Work in Wood and Mechanical Drawing, Hand Work for Teachers of Backward and Defective Children; Theory of Groups, Theory of Functions of a Real Variable, The Elements of Analytic Geometry and Graphical Algebra, The Essentials of Geometry and Algebra; Spectroscopy, Theoretical Mechanics, Electron Theory, Mechanics and Heat, Electricity and Magnetism, Teachers' Course in Physics; Singing Games and Folk Dances, Athletic Games and Standardized Team Games; International Law, American Party Government; Advanced General Psychology, Experimental Psychology, Introduction to General Psychology; Readings in Spanish, Elementary Spanish.

As in former summers, it was possible so to arrange the content and sequence of courses as to result in completing a program of which more than one-half were entirely new. Some of these were a continuance of the work which had been done by students in former sessions, and many more were in new subjects. The needs of elementary schools and high schools were kept foremost in the additional subjects which were introduced. The growth of the summer work can be best indicated by noting that the above program of seventy courses in eighteen subjects is the outgrowth of the original program in 1911 of twenty-one courses in twelve subjects. As in former years, each course met daily, five days a week during the period of six weeks. The instructors continued to hold conferences in addition to regular class instruction in which students were given the opportunity of presenting their individual needs for special assistance. It has been found that perhaps the most interesting feature of summer study and instruction consists in the personal assistance that is rendered to individuals by means of these daily conference hours. From the beginning this feature has been distinctive of the summer work, and it has succeeded in maintaing the high level of achievement which has appeared annually.

The staff of thirty-two instructors and assistants (six of whom were women) brought together eighteen representatives of other institutions of learning and systems of schools, who joined most enthusiastically with the fourteen members of the University in carrying on the instruction in the courses. The latter included Dr. John A. Anderson, Dr. A. B. Coble, Dr. Knight Dunlap, Dr. J. Elliott Gilpin, Dr. Gustav Grunbaum, Dr. Clarence W. Hewlett, Dr. John H. Latane,

Dr. Benjamin Lovelace, Dr. Robert B. Roulston, Dr. Henry Wood, with M. B. Hopkins as laboratory assistant. The former were: Dr. Bird T. Baldwin, Professor of Psychology and Education, Swarthmore College; Miss Anna Brochhausen, Supervising Principal, Indianapolis Public Schools; Clarence G. Cooper, Supervisor of Rural Schools, Baltimore County, Maryland; George M. Gaither, Supervisor of Manual Training Centres, Baltimore Public Schools; Miss Mary E. Gross, Supervisor, Children's Playground Association of Baltimore City; William J. Holloway, Superintendent of Schools, Wicomico County, Maryland; Miss A. Grace Johnson, Supervisor of Domestic Science and Art, Kokomo, Indiana; Dr. Alfred A. Kern, Professor of English, Millsaps College; Miss Edith A. Lathrop, Assistant Superintendent of Public Instruction, Nebraska; Dr. Herbert C. Lipscomb, Professor of Latin, Randolph-Macon Woman's College; Dr. W. Starr Myers, Assistant Professor of History and Politics, Princeton University; Dr. Robert L. Ramsay, Associate Professor of English, University of Missouri; Miss Grace E. Russell, Professor of Domestic Art, Iowa State College of Agriculture and Mechanic Arts; Dr. Asa A. Schaeffer, Associate Professor of Zoology, University of Tennessee; Miss Leonora A. Taft, Superintendent of Schools, Woodstock, Vermont; Mr. F. Courtney Tarr, Instructor-Elect in Spanish, Mt. St. Agnes College; Dr. Henry S. West, Director of School Affiliation and Professor of Secondary Education, University of Cincinnati, and Professor Willis H. Wilcox, head of the department of English, Maryland State Normal School. The addition of library and laboratory assistants was so arranged as to greatly increase the facilities for those who were pursuing the various courses. A greatly increased number of accessions were made to the departmental libraries to bring more completely to hand the material for each course.

A very interesting new feature of this session was the provision which the University made to meet the requirements of the revised State law, specifying the minimum training for teachers, which went into effect on June 1, 1915. Two professional courses on the Principles of Elementary Teaching, and School Management and School Law, with additional courses in Psychology, Elementary Methods, English and the Demonstration School were especially provided to enable persons, who had not been previously regularly employed as teachers, to meet the requirements of this new law. The response to these opportunities from many of the counties was very interesting. Through the misfortune if illness, Mr. Clarence G. Cooper was unable to continue giving the instruction after the second week. The work was ably continued and concluded by Superintendent William J. Holloway, who sacrificed other important summer plans for himself to this end. The reports as to the amount and quality of work which was accomplished by these persons inexperienced as teachers, have

been most gratifying and uniformly indicate the wisdom of the State in taking measures that will insure a minimum training for teachers.

The pioneer experiment in conducting a rural demonstration school as part of a summer session, which was begun here in 1913 with such marked success, was continued in 1915 on the basis of the lines which had been established during the two preceding years. The demonstration school and accompanying course on rural school methods and problems were in charge of Miss Ethel A. Lathrop, of Nebraska, who brought to this work the resources of a successful personal experience and critical acquaintance with the progress of the middle west in dealing with the particular educational problems in this field. Twenty-two children, from the rural district near Catonsville, attended the University daily under the conduct of Miss Bessie G. Reinhold. The work this session placed particular emphasis upon the teaching work within the school, and developed plans of attack upon rural school problems of this character.

The enrollment of students was four hundred twenty-eight, being an increase of 50 per cent. over the attendance in 1914. One hundred thirty, or 30 per cent. were men, and two hundred ninety-eight, or 70 per cent., were women. Over 15 per cent. of the students held academic or professional degrees, representing forty-three universities, colleges, and normal schools. 17 per cent. were undergraduate students in colleges seeking to advance their standing or to make up deficiencies in their work. 74 per cent. of the students included professors, superintendents, principals, and teachers in high schools, normal and training schools, supervisors and teachers in elementary schools, both public and private. The number of both teachers and students showed a very marked increase. This may be taken as a satisfactory indication of the quality of service which the summer courses are rendering to those who are engaged in educational work. Sixteen other occupations had representatives among the students to the extent of 6 per cent., while 9 per cent. were not engaged in any vocational pursuits.

The geographical distribution of the students in attendance is another indication which shows that the original purpose of the University, in arranging opportunities for summer study for the benefit of those engaged in educational work in Maryland, is being increasingly realized. Seventeen states, the District of Columbia, and one foreign country had representatives among the students. Three hundred sixty-three, or 85 per cent., however, were representatives of Maryland. Two hundred fifty-eight, or 60 per cent., of the enrollment represented the counties, and 25 per cent. of the enrollment made up the representatives of Baltimore City. It is most interesting to find that for the first time every county in Maryland had at least one representative among the student body. The numbers are as follows:

Allegany	5	Howard	12
Anne Arundel	13	Kent	22
Baltimore	39	Montgomery	5
Calvert	2	Prince George's	5
Caroline	24	Queen Anne's	12
Carroll	12	St. Mary's	1
Cecil	1	Somerset	5
Charles	1	Talbot	5
Dorchester	7	Washington	26
Frederick	28	Wicomico	10
Garrett	1	Worcester	1
Harford	21		

A large number of counties this year exercise the option given by the law of 1914, which permits a substitution of the plan of sending a definite percentage of teachers to summer schools in lieu of the annual county institute. As was provided by the State authorities at the time of ths enactment, this new policy, in which Maryland probably has taen the lead, will greatly aid the educational resources of the State in improving the quality of instruction in our schools by increasing the special preparation of our teachers.

The high quality of work which has always characterized the former sessions was in every way successfuly maintained this year. That the summer student is characteristically a hard working individual, is indicated by the following facts. Two hundred twenty-eight students, or 53 per cent., pursued three courses; one hundred thirty-four, or 31 per cent., two courses. Likewise the usual percentage remained to the end of the courses and stood the examinations and received their certificates of attendance or of examination. The academic credit allowed for the summer courses toward the Bachelor's degree remained the same as in the two years passed. The graduate work was introduced under the regulation of the Board of University Studies whereby one of the two years of resident work for the degree of Master of Arts may be absolved by attendance and study during three sessions of the summer courses.

This session was marked by the continued cooperation of the Peabody Conservatory of Music, and the new cooperation of the Children's Playground Association (Inc.) of Baltimore City. Under the auspices of the latter, two courses in playground and recreation work were offered, only one of which, however, was actually given. The Carnegie Endowment for International Peace cooperated in offering courses relating to American and International affairs. The Peabody Conservatory of Music, which was holding its fourth summer session at the same time, cooperated by way of giving instruction in the history of music and in providing the music in the purblic lectures and recitals. From the pleasure which came from these enjoyable occasions, special thanks are due to Mr. Frederick R. Huber, director, and other members of the Peabody summer session.

The opening reception of the University and the Conservatory sessions was held on Friday, July 9th, and the closing reception on Friday, August 6th, in the Peabody Art Gallery. The reception to the two summer faculties was given by the directors at the Johns Hopkins Club, Tuesday evening, July 6th. The series of evening recitals, lectures, and Sunday afternoon recitals was as follows:

July 9—Mr. Horatio Connell, Baritone, of the Conservatory.
Recital.
July 11—Mr. Harold D. Phillips, F. R. C. O., Organist.
Recital. "Representative organ works of French and German Schools."
July 13—Municipal Band and Community Singing.
July 16—Dr. John A. Anderson, of the University.
"Photographic Views of the Heavens." (Illustrated.)
July 18—Mr. Phillips, Organist.
Lecture-recital.
July 23—Mr. George F. Boyle, Pianist, and Mr. J. C. Van Hulsteyn, Violinist, of the Conservatory.
Recital.
July 25—Mr. Phillips, Organist.
Recital. "Transcriptions of works of great Masters."
July 27—Municipal Band and Community Singing.
July 30—Professor John H. Latane. of the University.
"The Advance of the United States in the Caribbean."
Aug. 6—Mr. Max Landow, Pianist, and Mr. Bart Wirtz, 'Cellist, of the Conservatory.
Recital.

A series of Monday and Thursday afternoon lectures on the history of music was conducted by Mr. Harold D. Phillips of the Conservatory, and was open to the members of the two summer schools:

July 1—(a) Early experiments in music.
(b) The foundation of Plain-song.
July 5—Early forms of notation and polyphony.
July 8—Folk-song.
July 12—The Polyphonic Schools of Belgium, Italy, England.
July 15—Beginnings of opera, oratorio, and instrumental music.
July 19—Rise of Italian vocal school and development of instruments and instrumental forms.
July 22—Bach and Handel.
July 26—Instrumental music of the 18th century.
July 29—Beethoven. Culmination of the Classic and Rise of the Romantic and Program Schools.
Aug. 2—Italian, French, and German Opera from the middle of the 18th to the middle of the 19th century.
Aug. 5—Brahms and Wagner.
Aug. 9—Modern developments.

Saturday excursions were taken to Annapolis on Saturday, July 17th, on the invitation of Dr. M. Bates Stephens, State Superintendent of Education, and to Washington on August 7th, on the invitation of Dr. P. P. Claxton, United States Commissioner of Education. The archaeological collection of the University was visited under the direction of Dr. Herbert C. Lipscomb, August 7th.

MARYLAND AGRICULTURAL COLLEGE SUMMER SCHOOL SESSION OF 1915.

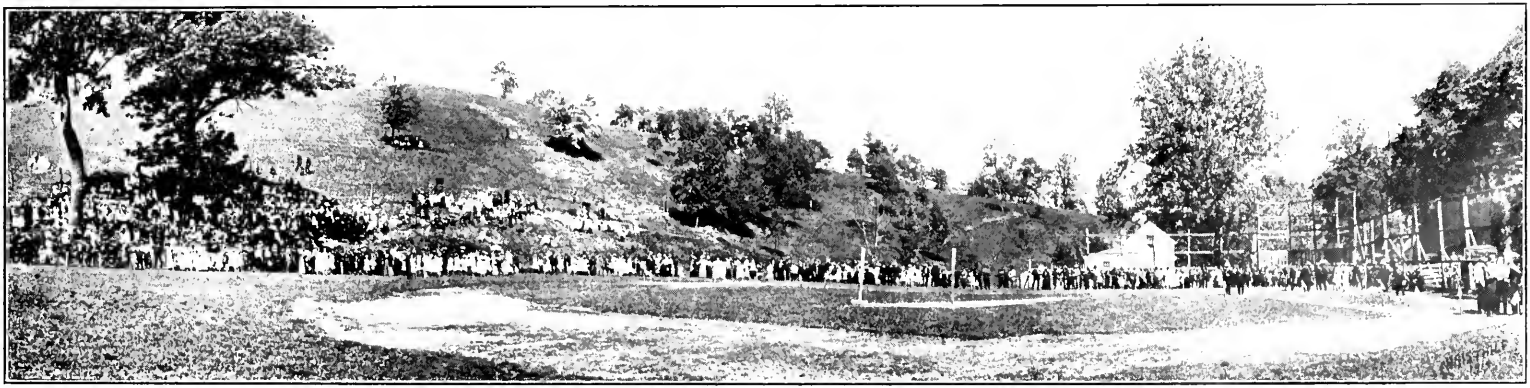
PROFESSOR J. E. METZGER, Director.

The work of the Land-Grant Colleges has been organized in recent years, into three main fields of activities, viz: Instruction, Investigation, and Extension. Two of these departments serve the people of the State throughout the entire year, and the conviction is that the plant, equipment and faculty of these institutions should likewise be utilized for instruction during more than the nine months of the college year. In response to this demand, the Summer Session was established in 1914, in order that the field plots, laboratories, shops, libraries, live stock, orchards, instruction and other facilities used by the regular students of the college might be available to those who for any reason find it more convenient to attend during the summer months. Although the school offers courses for teachers of all grades of school work, a special effort has been made to meet the needs of those employed in the rural and one-teacher schools.

The Board of Trustees has recognized the summer courses as an integral part of the work of the college by admitting these students on the same basis as the winter or regular college students, and by granting college credit for summer work. Thus the college courses are open to all men and women who are qualified to pursue them. The expense for the instruction is reduced to the minimum in order that it may be within the means of all. No tuition is charged the students of the summer school. The fees for the use of college property, laboratories and supplies are graded according to the kind and amount of work done by the student. These fees ranged during the last session from five to fourteen dollars. Students who pursued the review courses only, were exempt of all fees except the registration fee of five dollars.

A total of forty-eight regularly scheduled and five special courses were given during the session. This is an increase of thirty-five in the total number of courses offered in the Summer Session. With the exception of the work in elementary agriculture, the courses in the College of Agriculture are the same as those given during the regular college year. The large number of courses offered makes it possible for the student to select those subjects best adapted to the needs of his or her particular community. On account of the field work that may be done, many of these courses may be pursued with better advantage during the summer than during the regular college year.

For the convenience of the student the courses were divided into three groups. Group I consisted of Elementary School subjects, and included courses in Rural Elementary School Methods, Arithmetic,



Upper—STATE CHAMPIONSHIP MEET, TRACK AND FIELD, HOMEWOOD ATHLETIC FIELD, BALTIMORE

Lower—HOWARD COUNTY PUBLIC SCHOOL MEET, TRACK AND FIELD CHAMPIONSHIPS

English, Physiology, and Hygiene, and United States History. Group II was composed of Elementary Science and Vocational subjects, and included courses in Elementary Agriculture, Shop Work, Freehand Drawing, Handicraft, Domestic Science and Art, Biology, Algebra, Plane Geometry and School Library Economy. Group III constituted the college credit courses. The work in Group I was intended especially for teachers and prospective teachers who were effected by the new Minimum Training Law passed by the last Legislature. With the exception of the work in Elementary School Methods these courses aimed chiefly to strengthen the student in the subject matter and consequently contained only a minimum of the theory of teaching them.

It was the policy of a large number of students to pursue from one to two courses that would strengthen them directly in their school work for the ensuing year, and to fill out their schedule from the college credit group of studies. Fifty-nine students pursued one or more college credit courses, and four students did work for an advanced degree. A number of high school graduates enrolled for the beginning courses in order that they might lighten their first year's work in college. The largest enrollment in single courses were in Rural Elementary School Methods, English and Arithmetic. Eighty students pursued this work in education and sixty-five students enrolled in the Arithmetic classes.

The subjects offered in the 1915 Summer Session were: English, 4 courses; Mathematics, 7 courses; Education, 5 courses; Domestic Science and Art, 5 courses; Agriculture, 11 courses; Biology, 6 courses; Chemistry, 4 courses; Modern Languages, 5 courses; Drawing and Shop Work, 4 courses; Physics, 2 courses.

The total enrollment in the 1915 Summer Session was 141, or an increase of 169 per cent. Of this enrollment all except twenty-three live in the state of Maryland. Prince George's County furnished the largest number of students. The large increase in attendance is due doubtless to the increase in the scope of work offered, the expense which is kept at the minimum, and the establishment of strictly review and college credit courses. The enrollment by counties is as follows: Allegany, 2; Anne Arundel, 4; Baltimore, 1; Baltimore City, 4; Carroll, 1; Charles, 4; Dorchester, 7; Frederick, 12; Harford, 1; Montgomery, 9; Prince George's, 51; Queen Anne, 1; St. Mary, 3; Washington, 13; Wicomico, 2; Worcester, 3; District of Columbia, 21; other States, 2.

Thirty-two instructors were engaged in the work of the Summer School. Of this number twenty-five are members of the college faculty, and seven were from other institutions. The members of the instruction force who were engaged from other institutions were: Miss Theresa Weidefeld, former Supervisor in Baltimore County Schools, and a member of the Faculty of the Maryland State Normal School, who conducted the work in Rural Elementary School Methods.

The Domestic Science and Art courses were in charge of Miss Emma S. Jacobs, Supervisor of Domestic Science in the Washington, D. C. schools. Miss Jacobs was assisted by Mrs. Marion Potter, also of the Washington schools. Miss Alice Kochler, of Centreville, Maryland, assisted in the teaching of the courses in modern languages. The instruction in Library Economy was conducted by Miss Elizabeth Conner, at present Librarian of the College. Miss Lulu M. Burket, Physical Director of the Elementary Schools, Washington, D. C., was in charge of the Playground Work. Miss Burket was assisted by Mr. Darrow of the local Y. M. C. A. Mr. Edward A. Miller, Specialist in Agricultural Education, U. S. Department of Agriculture and Editor of Elementary Vocational Agriculture for Maryland Schools, was engaged for special instruction in the use of these lessons in the schools.

The conference hour, inaugurated in the first session was continued in the second session of the Summer School. This hour gave the students an opportunity to confer with instructors on subjects relative to their school work. The practice of having men of prominence in their special lines of work, address the students was continued also, except that the time was changed to the chapel period. These informal talks and discussions have grown to be one of the main features of the session, and one that has been of invaluable benefit to the student.

The number of students this year was too large and the interests too varied to accommodate all in one-party excursions as was done last year. Consequently, several excursions were arranged for each Saturday of the session. These groups of students were accompanied by one or more members of the faculty, thus making the day one of both instruction and pleasure. Among the places visited were the College Experiment Farm, the National Government Farms at Beltsville, Maryland, and Arlington, Virginia; the National Government Buildings and Museums, the Corcoran Art Gallery, Central Market, Rock Creek Park and Zoological Gardens; and Mt. Vernon and Great Falls, Virginia.

The educational value of organized play is recognized by teachers of all grades of school work. These exercises are exceedingly valuable to rural children on account of the associational activities that are involved. However, in order that mature people may be taught the children's playground and indoor games and folk-dances, they must eliminate their self consciousness, and to accomplish this they must have a skilled leader. The school was exceedingly fortunate in securing the valuable services of Miss Burket, of the Washington, D. C. schools for this part of the summer school work. In addition to the work done under the direction of an instructor, the students made frequent use of the athletic field, tennis courts, billiard tables, and the game rooms of the Y. M. C. A.

The weekly social gathering that was held in the college auditorium was well patronized by students, faculty, and friends of the college. The at-home evenings of President and Mrs. Patterson added greatly to the entertainment and pleasures of the student body. The joint picnic of the summer school students and the near-by Granges has become a permanent occasion. A notable feature of these entertainments was the absence of formality, and the prevalence of the freedom and fellowship characteristic of a democratic institution.

A most fitting exercise for the closing day of the session was arranged by the English class under the direction of Miss Weidefeld, their instructor. Grimm's "Hansel and Gretel" was staged under the forest trees of the North Campus. The evening exercises and the Summer Session was closed by a pageant in which the students portrayed the merits of their respective counties.

STATE SUMMER SCHOOL.

H. H. MURPHY, DIRECTOR.

OCEAN CITY, MD.,
August 10, 1915.

Dr. M. Bates Stephens,
Annapolis, Md.

DEAR SIR—I am enclosing you a statement of the finances for State Summer School.

Judging from the reaction of the students to the instruction, we conclude that the course was suitable to the needs of those who came.

The students were enthusiastic and capable and their general attitude towards work gave evidence of efficient training in their previous school experience.

Eighty-three students were enrolled from fifteen Counties, and their average daily attendance was 78.66, or about 95 per cent. of the enrollment. This fact alone should be a satisfactory evidence of their attention to school work.

The program for the day was divided into two sessions. The morning session from 8.45 to 11.30, and afternoon session from 2 to 3.45.

Some of the books from Normal School Library were used for reference work and in addition two pedagogical libraries from Maryland State Library Commission were in the building. Much interest was shown in the reading of these books.

A model school was organized in order to give the students an opportunity to experience the actual condition of class-room procedure and management. The pupils of this school were children from Ocean City. The school had pupils for each of the first five elementary grades. The average attendance of these 33 children was 31.4 or 95% of the enrollment. This statement should be a proof of the cooperation of the parents, and the interest of the pupils in the class room instruction. I desire to thank the State Board for appointing me as director of the School, and I trust the Board may feel that the school has performed, at least in part, the work for which it was created.

Respectfully submitted,

H. H. MURPHY,
Director.

FINANCIAL STATEMENT FROM STATE SUMMER SCHOOL.

RECEIPTS.

State Board of Educaion	$300.00
Governor Goldsborough	300.00
	$600.00

EXPENDITURES.

Paid Supt. Spaid	$75.00
Paid M. Annie Grace	100.00
Paid Mary H. Scarborough	100.00
Paid Prin. Edward Webb for lectures	50.00
Paid Dr. John O. Spencer	10.00
Paid Dr. Yokoyama	10.00
Paid Supt. Spaid	5.00
Paid Dr. M. Bates Stephens	10.00
Paid Printing	9.00
Paid Books and Supplies	30.89
Paid Freight and Postage	7.00
Paid Entertainment of Students	15.00
Director	178.11
	$600.00

LIST OF INSTRUCTORS AT STATE SUMMER SCHOOL.

Dr. M. Bates Stephens, School Law.
Supt. A. R. Spaid, of Dorchester County, Rural School Problems.
Prin. Edward F. Webb, of Frostburg Normal School, School Discipline.
Miss Mary H. Scarborough, of Normal School, General Methods.
Miss Annie Grace, Assistant Supervisor of Primary Grades of Baltimore County, Teacher in Model School and Instructor in Primary Plans.
H. H. Murphy, of Normal School, Psychology.

LECTURES AND ENTERTAINMENTS.

The following lectures were given to the students.

July 9—Dr. John O. Spencer, "Behind Firing Line."
July 16—Supt. A. R. Spaid, "The Mission of the Story."
July 23—Dr. Yokoyama, "Education in Japan."

On the evening of July 30, an interesting program was given to students and public by the pupils of model school and some of the students in summer school.

Games and songs by the model school and story-telling by the students were the attractive features. Misses Scarborough and Grace directed the program.

Musicals and beach parties were also given for the amusement and recreation of the students.

LIST OF COUNTIES AND NUMBER FROM EACH COUNTY.

	County	No. Students at State Summer School
1	Allegany	1
2	Carroll	2
3	Caroline	4
4	Cecil	3
5	Dorchester	9
6	Harford	1
7	Frederick	3
8	Kent	8
9	Montgomery	8
10	Somerset	7
11	Talbot	5
12	Washington	2
13	Wicomico	18
14	Worcester	11
15	Prince George's	1
	Total	83

TEACHERS' PENSION LAW.

(As Revised by Acts 1914, Chapter 736.)

62. Whenever any person in this State has taught in any of the public or normal schools thereof twenty-five years, and has reached the age of sixty years, and his or her record as such teacher has been without reproach, and by reason of physical or mental disability or infirmity is unable to teach longer, and who, moreover, is without the means of comfortable support, the said teacher may lay his or her case before the State Board of Education, supported in all cases by the recommendation of the Board of County School Commissioners of the county in which said teacher has last taught, and the said Board shall proceed to consider the same, and if the facts are found as above stated the said teacher shall be placed on a list, a record of which shall be kept by the said Board, to be known as the "Teachers' Retired List," and every person so placed on said retired list shall be entitled to receive a pension from the State of two hundred dollars per annum, to be paid quarterly by the Treasurer of the State Board of Education, so long as such pensioner is without other means of comfortable support, and the State Board of Education may in extraordinary cases waive the age limit as herein provided; provided, however, the applicant has all the other qualifications as provided herein. The Treasurer of the State Board of Education shall, on or before the twentieth day of the months of September, December, March and June of each year, certify to the Comptroller the sum of money necessary for the payment of said pensions for the current quarter as provided by this Section, and the Comptroller shall, on or before the first day of the months of October, January, April and July, issue his warrant on the Treasurer of the State in favor of the Treasurer of the State Board of Education for the amount so certified. That the sum of thirty-four thousand dollars ($34,000), or so much thereof as may be necessary, is hereby appropriated annually out of any moneys in the Treasury not otherwise appropriated to carry into effect the provisions of this act.

STATE TEACHERS' RETIRED LIST.

As Provided by the Foregoing Act. As of Date October 1, 1915.

John F. Neff, Cumberland, Allegany County.
Mary P. Chew, West River, Anne Arundel County.
Horace Tell, Bristol, Anne Arundel County.
Julia Watkins, 1017 E. 14th St., Spokane, Washington.
Lotta R. Jacobs, Elvaton, Anne Arundel County.
Rebecca G. Camden, 207 Gloucester St., Annapolis, Anne Arundel County.
Sallie H. Gamble, 1906 Market St., Wilmington, Del. (Baltimore County).

Susie V. Fleury, 115 West Twenty-third St., Baltimore City.
Elizabeth D. Cathcart, 2236 N. Calvert St., Baltimore City.
Mary C. Geddes, Baltimore City, Pine Crest, Catonsville.
Dorothy C. Short, 509 Woodlawn Road, Roland Park, Baltimore City.
Ella Faulac, 1522 North Caroline Street, Baltimore City.
Rosalie Barrett, Ellicott City (Baltimore City).
M. Joanna Crown, Berryville, Virginia (Baltimore City).
John H. Griffin, Bethlehem, Caroline County.
William L. Flagle, Frizzelburg, Carroll County.
Alfred W. Buckingham, Westminster, Carroll County.
G. W. J. Everhart, Manchester, Carroll County.
James S. Little, Frizzelburg, Carroll County.
Libbie M. Hayes, Elkton, R. F. D. No. 3, Cecil County.
John W. Posey, Wicomico, Charles County.
W. H. P. Bryan, Madison, Dorchester County.
Charles A. LeCompte, Cambridge, Dorchester County.
John W. Collins, Galestown, Dorchester County.
S. M. Donoho, Cambridge, Dorchester County.
Annie E. Duphorne, Emmittsburg, Frederick County.
J. Lewis Lutz, Middletown, Frederick County.
Mary E. Norris, Joppa, Harford County.
Mary A. Gibson, 3518 Tenth St., N. W., Washington, D. C. (Talbot County).
J. T. R. R. Carroll, Guilford, Howard County.
Samuel W. Wallis, Chestertown, Kent County.
William H. Pace, Washington Grove, Montgomery County.
George A. Barton, Stevensville, Queen Anne's County.
John H. Zuhlcke, Crisfield, Somerset County.
John F. Duke, Leonardtown, St. Mary's County.
John E. Kelly, 658 Oak Hill Avenue, Hagerstown, Washington County.
Franklin L. King, Williamsport, Washington County.
Lottie J. Fish, Salisbury, Md.
William A. Riggin, Sharptown, Wicomico County.
Amanda E. Dennis, Berlin, Worcester County.
George P. Morris, Freeland, Baltimore County.
S. Lizzie A. Starr, Cardiff, Harford County.
Isaac I. English, Mardela Springs, Wicomico County.
Laura A. Yeatman, 2209 Roslyn Avenue, Baltimore City.
Eliza S. McDevitt, 1123 West Franklin Street, Baltimore City.
William R. Winchell, Boyds, Montgomery County.
Fannie Eccles, Glasgow, Va. (Baltimore City).
Anna M. German, Powell Avenue, Raspburg, Md.
Louisa M. Kelley, 203 A Street S. E., Washington, D. C. (Baltimore City).
Susan M. Garrott, Libertytown, Md.
Laura Sherwood, 220 South Chester Street, Baltimore City.
William F. Brawner, Indian Head, Charles County.
Elizabeth A. Bennett, Ellicott City, Howard County.
William I. Weems, 233 E. Second St., Frederick City, Frederick County.
Benjamin Jenifer, Cambridge, Dorchester County.
Emilye Hyde, 341 East Twentieth Street, Baltimore City.
Mary Alice Smith, 1206 John Street, Baltimore City.
Eleanor W. Pindell, 654 A Orleans Pl., N. E., Washington, D. C. (Anne Arundel County).
Lydia A. Ennis, Aberdeen.
David A. Ebaugh, Upperco, Baltimore County.
Rebecca J. Haswell, 606 Lennox St., Baltimore City.
John L. Yater, 31 Albion St., Pt. Richmond, L. I., N. Y. (Baltimore City).
Julia A. Mumford, Berlin, R. F. D. No. 4, Worcester County.
John W. Abbott, Hampstead, Carroll County.
Victorine Power, Millington, Kent County.
Jane Burns Martin, 200 East Twentieth Street, Baltimore City.

Elizabeth A. Veirs, Lincoln, Cal. (Frederick County).
Lovie J. Armiger, 1518 Harlem Avenue.
Rose Marshall, 1744 Carswell Street, Baltimore City.
Robert Wallace Spear, Cambridge, Dorchester County.
Kate B. Hudson, Berlin, Worcester County.
Alexander Chaplain, Easton, Talbot County.
Dela Cullen, Crisfield, R. F. D. No. 2, Somerset County.
Lida J. Torrington Warren, Md.
Thomas L. Maclin, Atholton, Md. (Howard County).
Ella E. Nicolai, 1412 East Chase Street, Baltimore City.
Anna R. Cook, 411 W. Washington St., Hagerstown, Washington County).
Henrietta L. Mellier, Easton, Talbot County
Mollie E. Brown, Sparks, Baltimore County.
J. E. J. Buckey, Cumberland, Allegany County.
Joseph W. Griffith, Golden Hill, Worcester County.
Annie E. Offley, Havre de Grace, Harford County.
Anna K Bowen, Berlin, Worcester County.
Kate P. Downes, Centreville, Queen Anne's County.
Levi R. Stanley, Aireys, Dorchester County.
Lucy Garrett, Rockville, Montgomery County.
Charles C. Dail, Cambridge, Dorchester County.
Mrs. L. R. Howard, La Plata, Charles County.
Mary A. Cosgrove, Aiken, Cecil County.
Mollie A. Delanty, 600 Homestead Street, Baltimore City.
Annie E. Kinzer, Westminster.
Charles A. Thompson, Ellicott City, Howard County.
Ellen L. Ross, 3023 Westwood Avenue, Baltimore, City.

PUBLIC ATHLETIC LEAGUE.

REPORT OF WILLIAM BURDICK, M. D., *Director.*

BALTIMORE, MD.

Dr. M. Bates Stephens,
State Superintendent of Public Education,
Annapolis, Maryland.

DEAR SIR—The Public Athletic League herewith reports its activities in connection with state-wide athletics during the school year 1914-1915.

Maryland has accomplished unique results in educational matters by its successful athletics conducted first in the counties and finally in its state-wide meet. It had accepted the new doctrine that it had a responsibility for the recreation of its people, when at the last session of the Legislature an appropriation of four thousand dollars was made to the Public Athletic League of Baltimore in order that the League might extend its activities throughout every county in the State. It is the first State to recognize that in addition to public education and public health there is a great problem needing solution in regard to the whole subject of public recreation. Cities have seen this and for some years have furnished the citizens with opportunities for at least passive amusement in parks, boulevards and at bathing shores. The latter have also seen the great needs of the children for play and athletics and have begun to furnish opportunities for these active types of recreation. They have realized that the sports of youth make for character and have made beginnings of using the "vigorous, social, fighting plays of youth" (or athletics) for education for social life. Some states have started to arrange a program for passive recreation, as Massachusetts in its Metropolitan Park system, but Maryland is the pioneer in an attempt to make the athletics of a whole state count for the social good of its people.

State Senator William Milnes Maloy believed that: athletics "aside from the good to the individual boy, would promote a feeling of loyalty and remove as largely as possible from the next generation the antagonism between the county and the city that undoubtedly exists today." He stated that "he believed that the participation in state-wide athletics, contests and games would do much toward engendering a good feeling of kinship and a spirit of sportsmanship among those who soon will be the people of Maryland." He introduced the bill and fought for its passage as a part of the general appropriation bill even when it had been removed as impracticable by the members of the House of Delegates.

The officers of the League believed with Senator Maloy that this movement should be a part of the educational system and consulted

with you and the State Board of Education. It was learned that many of the counties had athletics as a part of its own program and the committee of county school superintendents, Messrs. Cook, Grimes, Holloway, Morelock, McVey, Phillips, and the Director recommended the following plan:

> The Committee recommends that the cooperation of the Public Athletic League in the conduct of athletic meets, particularly in connection with educational school "Rally Days", be accepted.
>
> The Public Athletic Leage is to furnish the medals as prizes for the athletic meet. They are also to send score sheets, entry blanks, and the necessary instruction and forms.
>
> The county is to furnish the programs and officials and also send the winners of the different athletics events, at the county's expense, to a meet to be held in Baltimore when the League will try to secure entertainment for the boys in the homes of the local school-boys.

The plan is to have each county conduct an athletic meet in the Spring, with the cooperation of the Public Athletic League, and then to have a "state meet" in Baltimore.

It was agreed that the boys should be classified in accordance with their weight and age, the dividing line of age being sixteen years on or before January 1st, 1915. The weight classifications are to be eighty pounds and under, ninety-five pounds and under, one hundred and fifteen pounds and under, Junior Unlimited Weight, and Senior Unlimited Weight. Boys will be weighed on the day of the meet in the costume in which they are to compete.

A boy may enter only two events in each meet, one running event and one field event. If the relay team is incomplete the boy may compete that day in the dash of his respective weight.

Eventually, the League plans to have a medical examination made of every boy who competes.

The events decided upon by the Committee are as follows:

80-POUND CLASS.	95-POUND CLASS.
50-yards dash.	60-yards Dash.
Standing Broad Jump.	Two-Standing Broad Jumps.
Baseball Throw for Distance.	Baseball Throw for Distance.
440-yards Relay Race (4 boys).	440-yards Relay Race (4 boys).

115-POUND CLASS.

70-yards Dash.
Running Broad Jump.
Baseball Throw for Distance.
660-yards Relay Race (4 boys).

JUNIOR UNLIMITED CLASS.

80-yards Dash.
220-yards Dash.
Running High Jump.
8-pound Shot Put.
880-yards Relay Race (4 boys).

SENIOR UNLIMITED CLASS.

100-yards Dash.
440-yards Run.
880-yards Run.
Running Broad Jump.
Running High Jump.
12-pound Shot Put.
One Mile Relay Race (4 boys).

The Committee also recommends, as rapidly as possible, the establishment of the Badge Test, a competition against standards, for instance, a boy who jumps 5 feet nine inches, pulls himself up to his chin 4 times, and runs 60 yards in 9 seconds will receive a badge signifying that he has completed this test.

There was immediately a most cordial reception of this attempt to secure uniformity in track and field athletics which are the simplest and most natural type and which are the transitional means of passing from the individual to the social games. It was gratifying to learn how this standardization of events met what was already a need among the schools. By talks at teachers' institutes, personal visits to schools and groups of schools, and correspondence, the plans were explained and readily understood so that the schools of seventeen counties and of the city of Baltimore took part in the program. Naturally, there was some misinterpretation but really very little. Three other counties were allied. Dorchester County used our medals; Kent County was obliged to postpone its meet on account of the illness of Superintendent Smyth; and Garrett County arranged for its meet to be held October 1, 1915.

From the beginning, the League planned to make athletics of value both to the individual and to the school. The badge test is planned to encourage each boy to try the natural activities of youth. The events are selected that require strength and skill of arms and legs as well as organic vigor. Each event is standardized so that the average boy may be successful if he practices. The result is he competes against

himself and receives an award if he can pass, just the same as when he passes an arithmetic test. Five hundred and sixty-one boys succeeded in winning the bronze badge. Next year a harder test will be given to winners of the bronze badge of this Spring.

While the badge test and physical education in general, together with medical examination (which I append) will help the health of the scholars, it is the social values of athletics that are the great concern of the League. Athletics have their greatest value in developing the latent social sense in every maturing boy and girl and we believe that moral training, as you suggest in your last report is so needed, can be greatly helped by their extension. When a boy feels a responsibility to his school as its representative he gets his first lesson as a member of society as well as a continuing stimulus to improve himself and the rest of his comrades. Fair play, honesty, and loyalty to others are far more easily learned by active participation in games than by any amount of reading or exhortation. Rivalry between classes and then between schools is the most potent method of stimulating earnestness when the enthusiasm can be directed and controlled. A very goodly number of boys entered the county meets, two-thirds of which were held in connection with Rally Days, thus deepening the social significance of the games in the boys' minds when they realize they were performing for the honor of their school.

The following were the entrants from each county:

	Entrants	Entries
Allegany County	229	355
Baltimore City	1215	1952
Baltimore County	505	838
Caroline County	129	275
Carroll County	206	343
Cecil County	182	359
Charles County	39	139
Frederick County	178	277
Harford County	17	39
Howard County	191	335
Montgomery County	213	504
Prince George's County	197	492
Queen Anne's County	99	151
Somerset County	103	154
Talbot County	199	334
Washington County	163	206
Wicomico County	263	371
Worcester County	103	179
	4231	7303
Maryland State Olympiad	514	514
	4745	7817

The climax of the season was the State Meet held at Homewood Athletic Field, Johns Hopkins University, June 11. That morning the Trustees entertained the visiting winners of the county school

meets at the Engineering Buildings and served lunch to all present. All through the day there was evident the "guest friendship of old Greece." The boys came as competitors truly; but more as friends than enemies. Every boy who came to the city was entertained at the home of some friendly Baltimorean and we did not have boys enough to fill the homes awaiting them. The spirit of friendliness between boys cannot fail to make a better understanding between our men in days to come. It was interesting that the boys representing Baltimore County carried home the greatest number of the medals thus winning the championship of the State.

The League desires to express its gratitude for the splendid co-operation of all the county school superintendents, commissioners and teachers who alone made possible such important work. They really did the work for they promoted the meets; made it a part of the school curriculum; prepared and printed the programs; planned the tracks and attended to countless details. It believes that the monies spent in sending the boys as representatives to Baltimore will return to the counties in the form of greater enthusiasm and of better scholarship and of deeper loyalty to loyalty that eventually will help all Maryland.

Respectfully submitted,
PUBLIC ATHLETIC LEAGUE,
William Burdick, M. D., Director.

BALTIMORE, MARYLAND.

Dr. M. Bates Stephens,
State Superintendent of Public Education,
Annapolis, Maryland.

DEAR SIR—During April, May and June of 1915, the medical department of the Public Athletic League extended its activities throughout the State of Maryland in connection with the several county school meets. The medical supervisor or physician under his direction was present at sixteen contests and examined entrants to see that no one participated who was physically unfit. Where time allowed and the number examined was comparatively small, more time was spent with each individual and other defects were noted, which while not severe enough to bar the youth from the games, might at a future period be the cause of serious illness. The results noted below are valuable only as concerns hernia, undescended testis, hydrocele and varicocele, since these were looked for in every case.

Total number examined, 1341.

Defects noted in 94 boys.

Otitis media, chronic	1
Teeth (3 or more decayed)	25
Adenoids	9

Diseased or enlarged tonsils	15
Heart, hemic (anemia)	5
Heart, valvular disease	10
Hernia, inguinal	13
Hernia, inguinal (wear truss)	3
Hernia, ventral	1
Hydrocele, bilateral	1
Hydrocele, unilateral	1
Hydrocele of cord	1
Phimosis (bad)	9
Enuresis	2
Undescended testis—unilateral	8
Varicocele (bad)	13
Tumor of testis	1
Edema of external genitalia	1
Acute synovitis (knees)	1
	120

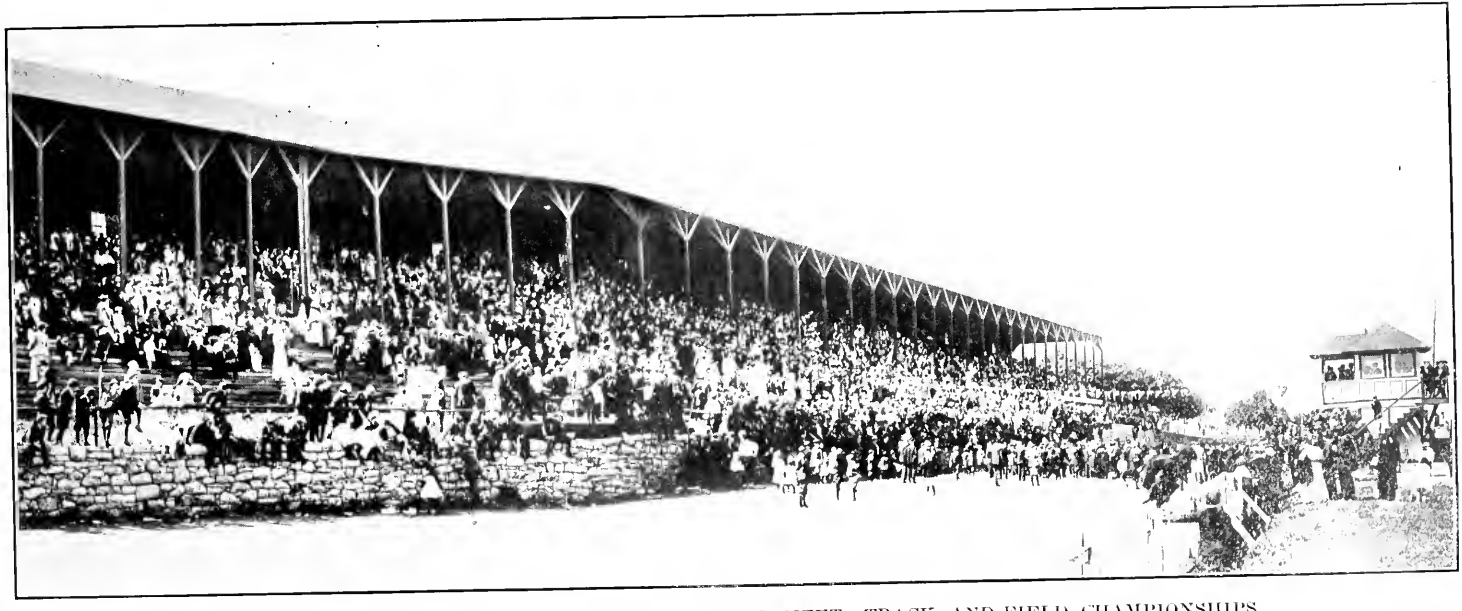
Not passed:

Heart disease	10
Hernia	14
Hydrocele	2
Acute Synovitis	1
(2%)	27

The parents of the boys who were in need of medical, surgical or dental attention were notified of the fact by letter and general advice was given as to the best methods of treatment. Return cards were enclosed to be mailed to this office telling what had been done in each case. Where no response was received a second "follow-up" letter was sent. On many occasions parents and adults present at the examination expressed their hearty approval of the procedure of having a physician see that the competitors were in good physical condition before being allowed to "run the race".

Almost every heart, hernia, hydrocele, undescended testis, the most serious defects, were unknown to the boy or parent until discovered by this department.

The response to treatment has been very encouraging, considering the fact that no actual attempt except by letter was made. In 94 individual cases, 15 boys (15.95%) are already reported as having been treated.



WASHINGTON COUNTY PUBLIC SCHOOL ATHLETIC MEET—TRACK AND FIELD CHAMPIONSHIPS

Surgical.	
Operative.	
Hydrocele	1
Circumcision	3
Tonsile and Adenoids or both removed	3
Non-operative.	
Suspensories	3
Medical.	
Heart, hemic (anemia)	2
Heart, valvular disease	3
Dental.	
Teeth cleaned and filled	1
	16
Total individuals (15.95%)	15

Respectfully submitted,

ALFRED W. BROWN, M. D.,

Medical Supervisor, Public Athletic League.

AGRICULTURE IN THE HIGH SCHOOLS.

J. E. METZGER, Supervisor.

Probably the most striking evidence of the increasing interest in secondary agricultural education in this State, is the large number of schools that have provided for these courses during the past few years, and certainly no high school movement has aroused greater interest than the introduction of agricultural instruction. There are at present in Maryland twenty-one high schools in which courses in agricultural are offered. In general this work is organized as a special department of the school, and an especially trained teacher is employed for its administration.

The purpose of the agricultural course in the high school is to provide for the boys and girls of the rural districts, "that form of vocational education which fits for the occupations connected with the tillage of the soil, the growing of crops, the use of fertilizers and farm machinery, the care of domestic animals, forestry, and other wage earning or productive work on the farm, or in the garden or greenhouse." It is seen that the controlling purpose of the agricultural course is to fit persons for profitable work in the home community, and is not intended for naturally backward or deficient students, or for merely holding children in school.

Through the granting of special aid to the high schools for the maintenance of agricultural departments, the State has established the policy of forming a joint partnership with the local community for securing effective training in rural vocations, and as a member of the partnership the State must insist upon adequate and satisfactory results based upon a cooperative spirit between local and State agencies. It is not reasonable for the State to give special aid to this form of instruction unless it is assured that the dominant aim is to prepare boys for successful callings in rural communities. It seems that any school not meeting this ideal or wilfully diverting the intent and purpose of the work is not worthy of the special State aid and that such aid should be withheld.

There is a notable improvement in the training and efficiency of the teachers of agriculture of the State. The new law pertaining to the preparation and registration of teachers will prevent the employment of any teacher in the future who has not had the necessary training for the work required. This law is so far as it pertains to the teacher of agriculture in the high school is construed to mean that he has had a training in technical agricultural in addition to a collegiate training in the science and art of teaching.

The length of service of agricultural teachers is entirely too short. A review of the length of service of the teachers now employed in the agricultural departments of Maryland high schools shows that the

average tenure is less than two years. This is due to the great demand for these men in other agricultural pursuits and to the limited supply of well trained men. The problem may be reduced to a minimum by the employment, as far as is possible, of home teachers, by the adjustment of salaries and by increasing the length of service. The agricultural teacher should be employed for the entire year in order that he may render the greatest possible service to the community.

The newness of the work, the lack of text-books, precedents and traditions place great responsibility upon the teacher. There should be no relation between his receiving the proper license to teach and the approval of his work in the school, since the first is based largely upon his personal and collegiate record, and the second upon his actual work in the school as a teacher.

While it is of the greatest importance that the school extend its activities into the farm home, it must be remembered that this can be done to the best advantage through the boys enrolled in the agricultural courses. Each course should have for its completion the execution of some definite home project. This project is to be selected and conducted under the direct supervision of the agricultural teacher. By supplementing the recitation and text-book work with the actual execution of the practices advocated, there will be no danger of the new high school subject becoming a mere academic performance.

The agricultural laboratory should be equipped with permanent desks, storage cabinets, and bins for the storage of the material essential for each phase of the work. The desks should have both a water and gas supply so that individual work may be done. The agricultural laboratory should be considered a work shop where the scientific principles of the subject are being worked out.

The school should aim to collect a large supply of useful illustrative material. This permanent exhibit may be placed in the agricultural room if space will permit or in the corridors or the building. The exhibit should consist of a complete set of local farm products in addition to specimens from other localities. Local school and county fairs are usually productive of a large amount of available material. However, to make the exhibit usable in the class work it must be properly labeled and catalogued.

Much of this laboratory material and apparatus may be secured from the local dealer or may be made by the students. There is, however, a tendency to use too many makeshifts. There should be purchased annually a definite amount of apparatus until the department is fully equipped; after that it becomes merely a matter of maintenance. While the amount of apparatus needed will depend largely upon the number of students and the character of the work, there is certain apparatus that is essential for any successful agricultural

teaching. Great care should be exercised in the selection of the apparatus so that the limited amount of money available will be put to the greatest possible use.

Teachers should make an annual inventory of the apparatus on hand and should include in their requisitions for supplies all the material and apparatus that need to be purchased for the work of the succeeding year. School officials may well require of the teacher a list of the illustrative materials that he expects to use during the following year's work together with the source from which and the time in which it is to be secured. Such a list is doubly valuable in the event of a change of teachers. It also prevents the too common practice of neglecting the securing of laboratory materials until it is wanted for use. It likewise makes it necessary for the teacher to work out his laboratory course previous to the time of giving the work.

A supply of well selected agricultural books and bulletins for both students' and teachers' use constitute an integral part of the department's equipment. It is not necessary to buy a large number of books at one time. If a few well chosen books are added each year the department will soon have enough of reference books to give the course the desired breadth and scope. It is important that the agricultural books be listed in the general library of the school, but kept in the agricultural room. Bulletins should be kept in files and a card index should be made of them so that it will be easy to find a bulletin when wanted.

The following is a review by counties of the agricultural work of the high schools:

ALLEGANY.—The Flintstone school in Allegany County has offered a course in agriculture for the past two years. Flintstone is located in one of the mountain valleys, about ten miles from Cumberland.

The school building is a two-story, frame structure, and is not wholly suited to the new work. As yet no special facilities for laboratories are provided. However, a splendid out-of-door laboratory in field and garden crops has been maintained.

BALTIMORE.—The Sparks school in Baltimore County is the second oldest of the agricultural schools in the State. The school was organized as an agricultural high school but at present offers other courses also. This school has two teachers of agricultural subjects, separate laboratories for the study of soils and crops, farm machinery, farm blacksmithing, and agricultural library, and several acres for crop demonstration work. A full four-unit course in agriculture is given. The enrollment in the agricultural work is 33. The Sparks school has made commendable progress in its activities with the farmers of the community, as well as in the home project work of the pupils. The community work has been greatly facilitated during

the past year by the publication of a monthly magazine devoted chiefly to school notes and timely articles pertaining to farm operations.

CAROLINE.—The Denton, Ridgely, Preston, and Federalsburg schools of Caroline County offer courses in agriculture. These courses are correlated with the science work of the school, and are offered during two of the four years. The work in these schools consist of a general agricultural course offered in the eighth grade, and a reading course combined with a study of special agricultural subjects given in the tenth grade. Both Ridgely and Federalsburg with their new buildings are admirably equipped for a full agricultural department. The Ridgely school is particularly fortunate in having an experiment station located at its doors and sufficient school land for a model out-of-doors laboratory. The enrollment in these schools is as follows:

	HIGH SCHOOL.	AGRICULTURAL COURSE.
Ridgely	44	9
Denton	112	12

CARROLL.—Agriculture has been taught for three years in the Mt. Airy High School. The work has been developed as a regular course in the school. The first class will be graduated in 1916. The chief handicap in the work has been the inadequate space available in their temporary quarters. An effort is being made to secure a new high school building to be located on a tract of land at the edge of the village. The new location will make possible the inauguration of a strong agricultural department. The school has a splendid supply of illustrative material. In addition to the regular work, the school has offered short courses for its patrons, and has held spraying demonstrations on farms in the community. The high school enrollment is 56, and the enrollment in the agricultural department is 30.

CECIL.—The Calvert high school in Cecil County was the first high school in Maryland to introduce a course in agriculture. The school is located in an attractive agricultural community. Agricultural work is offered in each of the four years of the high school course. Under the present plan a somewhat general course is offered in each year, but special emphasis is placed upon the main divisions as indicated by the state course of study. The proposed new building should greatly facilitate the agricultural work in this school. The high school enrollment is 51, in the agricultural department 51.

DORCHESTER.—A general course in agriculture is offered by the Hurlock high school. It forms a part of the general science course of the school. The Vienna School upon being admitted to the second

group of high schools proposed to make agricultural one of their special departments. An especially trained agriculturalist will be in charge of the work.

FREDERICK.—Agricultural departments are maintained in the Boy's High School at Frederick and in the Middletown High School. Each school has a separate class room and laboratory and a fairly full library of agricultural books. On account of their locations the problems presented by the two schools are vastly different. Pupils of the Frederick High School are from the city. To make their agricultural course practical it is necessary to maintain a demonstration plot on which the students will grow a large variety of crops according to approved methods. The pupils of the Middletown High School are farm boys, and much of their practice work may be done on the home farm under the joint supervision of the instructor and the parent.

Both of these schools have been active in teaching approved farming methods in the county through short courses and farmers' meetings. The Frederick school held a three-months short course for farm boys. Although the enrollment this year was small this work should be continued, and an effort should be made to enroll as many of the non-high school boys as possible. Enrollment:

	HIGH SCHOOL.	AGRICULTURAL COURSE.
Frederick	173	5
Middletown	91	19

HARFORD.—Agriculture is taught at the Jarrettsville and Street high schools. For several years the agricultural work of these schools was done by one teacher, but at present a trained agricultural teacher is employed for each school. Each of these schools is being equipped for full four units work. Each school has a laboratory and a plot of land for agricultural students use. The community work of the schools has been done largely through the local farmers' and boys' organizations. A large part of the work of the boys' clubs being a joint school and club project. Enrollment:

	HIGH SCHOOL.	AGRICULTURAL COURSE.
Jarrettsville	55	31
Street	45	18

MONTGOMERY.—The Sandy Spring and Brookville High Schools each maintains a department in agricultural. These are now the only two schools in the state in which one man does all of the agricultural work. The Sandy Spring High School has a splendid laboratory and library equipment. Although, the school land has been abandoned, a

special effort is being made to inaugurate home project work. The school is located in a thrifty agricultural section and has the possibility of building up an especially strong agricultural dpeartment. Enrollment:

	HIGH SCHOOL.	AGRICULTURAL COURSE.
Sandy Spring	49	21
Brookville	38	5

PRINCE GEORGE'S.—A four unit high school course in agriculture is maintained at the Baden high school, and a trained agricultural teacher is employed for the work. The laboratory and library equipment as yet is rather limited but it is being enlarged yearly, mainly through local effort. The school has under cultivation several acres of fruits and vegetables. Considerable revenue has been secured by the school through the sale of seedlings to the local truck farmers. The school authorities report that the influence of the agricultural department is becoming quite apparent throughout the community. At present a one-year general course in agriculture is given by the Clinton High School. Enrollment:

	HIGH SCHOOL.	AGRICULTURAL DEPARTMENT.
Baden	56	22
Clinton	56	5

QUEEN ANNE'S.—The Centerville High School offers agriculture as one of its four-year courses. The department is well equipped and has roomy quarters. The school at present does not have any land for laboratory purposes, but much valuable work was done by the students and instructors in the planting of shrubbery, and otherwise beautifying the school grounds. The school has been active in developing the dairy industry of the community through the class work in stock judging and milk testing. The pupils keep milk records and bring in samples each month to be tested. The hatching of a brood of chicks in an incubator formed part of the poultry course.

Two conferences of the agricultural teachers of the secondary schools of the State have been held during the year. The first of these conferences was held at the Maryland State Normal School, in Baltimore, on November 20th and 21st, 1914. The second of these meetings was held at the time of the Maryland State Teachers Association at Ocean City.

The purpose of these conferences was not to mark out any new departure in the agricultural teaching, but rather for the purpose of agreeing upon certain lines of activity and procedure that should characterize the work throughout the State. The discussions were

confined chiefly to the classroom and laboratory work ordinarily attempted in the agricultural course. It was evident from the discussions that there is at present no common or uniform standard of the contents of these courses, and furthermore that in the past none was desirable. This condition enabled each school to adapt the State courses of study to its local needs. However, there was a feeling among the men that the time was at hand for the preparation of an outline setting forth the requirements of a standard course in each of the several divisions of the subject, and thus avoiding waste of time and failure to secure concrete results on account of not having definite purposes and well conceived plans.

The attendance at the Baltimore meeting was most gratifying—ninety-five per cent. of the teachers of agriculture were present. Owing to the fact that many of the men are residents of other states, and that some of them were in attendance at summer schools, only a small percentage of the teachers was present at the Ocean City meeting.

In most instances the patrons and school board are greatly interested in the agricultural work taught in their school. There is an abundant evidence that the vocational studies can be made to train boys in the things that they will do as men, that they tend to bring the high school in closer touch with the people, that they lead the boys to a greater interest in the farm, and in the wedfare of the rural community.

Respectfully submitted,

J. E. METZGER.

ELEMENTARY VOCATIONAL AGRICULTURE FOR MARYLAND SCHOOLS.

BY E. A. MILLER.

SPECIALIST IN AGRICULTURAL EDUCATION. STATES RELATIONS SERVICE. U. S. DEPARTMENT OF AGRICULTURE.

INTRODUCTORY STATEMENT.

The teaching of agriculture in the elementary grades of the public schools is now looked upon as being fundamentally important. The fact that the great bulk of the pupils never get beyond the elementary grades emphasizes this importance and makes it necessary that the agricultural instruction be vocational in character and be applicable to the community farming conditions.

With a view of meeting such a need in the Maryland schools the State Department of Education, the Maryland Agricultural College, and the States Relations Service of the U. S. Department of Agriculture entered into an agreement in the month of October, 1914, to make a study of the school and agricultural conditions of the State and prepare a course in elementary agriculture based upon the results of such a study.

AGREEMENT.

The agreement entered into by the three above named institutions provides for the ascertaining of existing facts with reference to the various types of agricultural instruction in the State of Maryland, the developing of methods for studying conditions affecting agricultural edueation; and the preparing of literature for the teachers in the rural elementary schools of the State.

The agreement, also, provides that the State Department of Education furnish all the available printed information as to the schools of the State and prepare the way for gaining other information from county superintendents and teachers through visits and questionaires; that the heads of the departments of the Maryland Agricultural College and experiment stations furnish statements concerning the growing of farm crops and animals in Maryland for each month of the year having in mind the best management and practice for the State; that the representative of the States Relations Service of the U. S. Department of Agriculture prepare the course in agriculture based on the information and statements received from the two sources.

PLAN OF THE PUBLICATION.

The lesson topics are presented after a monthly sequence plan. It is hoped that by presenting the lessons in the subject of agriculture at the time the principles in these lessons are practiced or should be practiced on the farms of a community, two things may be accomplished; namely, the classroom work may be greatly vitalized by having timely material at hand for practical work and the things that are best to do on the community farms are taught at the time they should be done. Although the sessions are developed quite fully, references are made to the text-books used in the State and to the publications of the U. S. Department of Agriculture and the Maryland Agricultural Experiment Station. The attention of the teachers of the State is called to these references as a suitable reading course in agriculture.

The practical exercises in connection with each lesson provide for home observations, visits to observe special farm operations, community surveys, and home or club projects. It is urged that the teachers emphasize the practical work, as this is important in giving vitality to the classroom instruction.

In connection with each lesson topic correlation exercises are suggested. These are intended to indicate how the teacher may take advantage of the experiences and problems of the pupils in their practical work to give vitality to the subjects of English, arithmetic, geography, history, drawing and the like.

PUBLISHING AND DISTRIBUTING THE MATERIAL.

The course in elementary vocational agriculture as described in the foregoing has been completed. It includes work for nine school months, September to May. The Maryland Agricultural College is having it published. Copies in any quantity will be available at an early date. County Boards of Education should provide themselves with a sufficient number to place a copy in the hands of each pupil of the grades studying agriculture. The charge is a nominal one, being the absolute cost of printing. Counties that have not adapted a text book should consider the advisability of using this course as it is applicable to Maryland conditions and the cost of the books as compared with other texts is insignificant.

DEPARTMENT OF EDUCATION.

BALTIMORE, MD.

OFFICE OF THE SUPERINTENDENT.

June 30th, 1915.

Hon. M. Bates Stephens,

State Superintendent of Education,

Annapolis, Md.

DEAR SIR—I have the honor to sibmit to you the usual statistical reports concerning the activities of the Baltimore Public School system for the scholastic year, ending June 30th, 1915.

There has been a steady increase in enrollment in our schools, which surely can be taken as one of the evidences of their continued popularity. Changes for the betterment of the system have slowly been bearing fruit. Emphasis is being laid upon fundamentals, and thoroughness and accuracy are now constant aims. Instruction is made as practical and vocational as is consistent with cultural standards.

In our secondary schools the opportunities for vocational courses have been eagerly sought. Our Commercial and Household Arts Courses have been so framed that the students taking them can readily find employment, when they leave our institutions.

The vocational and continuation classes of our summer schools have achieved success; and it is hoped that still better work in this direction will be accomplished in the coming year.

Great progress has been made in strengthening and broadening the courses in our evening schools. The earnestness, enthusiasm and diligence of the student body of the Baltimore City College and Polytechnic Institute evening classess are possibly not surpassed in any other institutions of a like nature. Very commendable results have been recorded.

Public evening lectures, stereopticon entertainments, and musicales have been given under the auspices of the School Board, in the field of the wider use of school buildings as community centers.

The Public Athletic League, Playground Association and other Social Service Agencies have zealously co-operated with the School Board in advancing the physical welfare of the public school pupils.

It gives me pleasure in conclusion to testify to the untiring energy and zeal of our Board of School Commissioners in the maintenance of progressively thorough educational ideals, and to their sympathetic consideration of the labors of the Board of Superintendents in behalf of the cause of public education.

I beg to remain,

Respectfully,

FRANCIS A. SOPER,

Superintendent.

COUNTY SUPERINTENDENTS' SUPPLEMENTARY REPORTS.

BALTIMORE COUNTY.

ANALYSIS OF THE ENROLLMENT OF PUPILS AND THE PER CAPITA COST.

The total enrollment of pupils for the year closing July 31, 1915, was 23,494, an increase of 1,040 over 1914. The average enrollment was 21,044, an increase of 886 over 1914. The average attendance in the White Schools was 81.7 per cent.; in the Colored Schools, 68.7 per cent.

There is a slow but notable tendency toward a decrease in the percentage of children in the lower grades and a corresponding increase in the percentage of pupils in the higher grades. This is a tendency in the right direction, and is due in part to a better adaptation of the course of study to the needs of the children, through greater skill in teaching; and in part to greater care exercised by Principals and Assistant Teachers in working with over-age and deficient children.

The net cost of operating the schools for the year was $546,713.38, found by deducting $7,020.48, Balance on Hand, and $18,782.06, Cost of New Buildings. Dividing the net cost of operating the schools by the average enrollment of 21,044, we find the Cost per pupil per School Year, $25.98, which sum divided by 193 days in the school year, gives 13 cents as a daily cost of operating the schools for each child.

In the "Table of Expenditures by Schools" on the large folder in this report the cost per pupil per year and the cost per pupil per school day are shown for each school in the county, based on the average enrollment. The greatly varying costs are easily traced by looking over the items of expense. Teachers' salaries and the number of children per teacher are the largest factors by far. In general, the larger schools have fewer grades per teacher, but more pupils per teacher, hence a lower per capita cost. A comparison of schools will show that in some instances it costs less per pupil in some of the high schools than in some of the smaller one- and two-teacher rural schools. A small additional enrollment, often of only eight or ten pupils, may give a school an additional teacher; also a school that averages 85 per cent. in attendance will have an assistant teacher on an enrollment of 48 pupils, while another school may enroll as many pupils, but does not make the average for an assistant.

NOTE.—The **average enrollment** is a fairer basis for reckoning the cost per pupil than the **average attendance**, because average enrollment is affected little by bad weather and children's diseases; it also represents more accurately the number of children who have to be provided for in the way of teachers, desks, books and all other expenses.

The following table shows how the "Cost per Pupil per School Year" is made up:

COST PER PUPIL PER SCHOOL YEAR, $25.98.

1. Cost of Teachers' Salaries per Pupil per Year	$19.09
2. Cost of Janitors' Salaries per Pupil per Year	.89
3. Cost of Fuel per Pupil per Year	.88
4. Cost of Free Text Books per Pupil per Year	.78
5. Administration Expenses, including Office Salaries, Salaries of Clerks, Printing, Advertising, Insurance, School Libraries, Attorney's Fees, Farm Extension, Commencement Exercises, Diplomas and Tuition Fees Paid Adjoining Counties per Pupil per Year	.67
6. Cost of Apparatus and Furniture per Pupil per Year	.59
7. Cost of Supervision in Grammar Grades, Primary Grades, Rural Schools Manual Training, Domestic Science; also Stenographer in city office, per Pupil per Year	.48
8. Cost of Stationery and Supplies per Pupil per Year	.42
9. Cost of Domestic Science and Manual Training Equipment and Supplies per Pupil per Year	.3[illegible]
10. Cost of Transportation of Pupils per Pupil per Year	.36
11. Rents: Buildings, Water, Ground, and Electric Lights per Pupil per Year	.36
12. Cost of Janitors' Supplies, Sanitation and Items of Maintenance paid to Principals per Pupil per Year	.35
13. Cost of Repairs per Pupil per Year	.31
14. Office Expenses: Furniture, Rent, Stationery, Postage, Freight and Express, Examinations, Teachers' Library, Telephones, per Pupil per Year	.24
15. Institute Expenses and State and County Associations per Pupil per Year	.17
Total Cost per Pupil per Year	$25.98
Total Cost per Pupil per School Day (193 days)	.13

PROGRESS DURING THE YEAR.

1. A new course of study was organized by the teachers and supervisors working in committees by grades, by subjects and by schools, with the helpfull criticism of out side specialists in subject matter.

2. Special efforts were made in teaching music in the grades through the assistance of Mrs. Henrietta Baker Low, of New York. The results satisfied the Board that further effort should be made along similar lines next year.

3. The work of the public Athletic League was extended to include instruction for both boys and girls weekly in all the high schools and at Highlandtown. This included medical inspection of all who took part in the exercises. The work was worth while. Our schools also won the State Athletic Meet against the city and all the other counties.

4. We are working toward standardizing the work in Reading, Writing, Arithmetic, Spelling and English Composition, both for the county at large and for the individual school. Our efforts have been confined mainly to Arithmetic and Spelling. The teachers have worked co-operatively, and more than a beginning has been made. It is hoped that in time all the teachers will be able to apply Baltimore county standards to their work.

5. An increased effort was made in enforcing the compulsory attendance law, and better results were obtained. John T. Hershner, Assistant Superintendent, has charge of this work.

6. The system of individual pupil's record card, recommended by the U. S. Bureau of Education, was extended to include all the one-teacher rural schools.

Respectively submitted,

ALBERT S. COOK,
Superintendent.

CARROLL COUNTY.

WESTMINSTER, MD., October 27, 1915.

Dr. M. Bates Stephens,
Department of Education,
Annapolis, Md.

DEAR SIR—In addition to the statistical report forwarded to you some time ago, I beg leave to submit the following supplementary report of the public schools of Carroll County for the fiscal year ending July 31, 1915.

In looking back over the year's work we feel that we have reason to believe that considerable progress in various directions has been made. By far the most gratifying feature is the manifest desire on part of the teachers for self improvement. A larger number than ever before attended summer school, and the amount of professional reading was very much greater than was ever done in any previous year, as our enrollment in the State Teachers' Reading Circle will show.

For the first time in many years all the scholarships in the State Normal School from our county are filled which fact is probably due to the encouragement given to specially prepared teachers under the teachers' salary law enacted by the last Legislature of Maryland fixing the minimum for teachers of that class. Whatever may have been the cause of the increased desire for professional training on the part of those entering upon the work of educating and training the children of our county, we feel that it indicates an era of better-prepared teachers, and consequently of better schools.

Within the last three years the local tax rate for school purposes has increased from 21 cents to 30 cents on the hundred, which is the rate for the year 1915-1916, and the teachers' pay roll has increased from $72,000 in 1912-1913 to nearly $80,000 in 1915-1916. From this statement it will be seen that the increase in teachers' salaries has not been commensurate with the increase in local school revenues. This is due to the fact that the gain in local revenue has been partly offset by a decrease in the state appropriation and the increased expense of repairs and school equipment.

Many of the school buildings, especially in the rural sections, of the county, were built some years ago, when little or no attention was given to sanitary conditions such as light, heating, and ventilation. Several buildings of this kind were remodeled within the last few years, and it is the intention of our Board to make further improvements along this line as rapidly as the funds at hand will permit.

A new eight-room building is being erected at Mt. Airy, and will be ready for occupancy by January 1, 1916. In planning the building, provision was made in the basement for Manual Training and Domestic Science departments in order that when the enrollment in the high school reaches eighty, and the school is made a first-group school, we shall be ready to fit up and equip these department with as little delay as possible.

We feel that a favorable sentiment in regard to public school work prevails in nearly all sections of our county.

Respectfully submitted,

GEO. F. MORELOCK,
Superintendent.

CHARLES COUNTY.

LA PLATA, MD., October 29th, 1915.

Dr. M. Bates Stephens,
State Superintendent of Education,
Annapolis, Md.

MY DEAR SIR—I herewith submit to you the report of the School Commissioners of Charles County, for the Scholastic year ending July 31, 1915.

School conditions in Charles County for the year just closed have been marked, we think with encouraging signs of progress, both in the general interest of the people and the professional earnestness of the great majority of our teachers.

It is superfluous probably to report that the inability of our Board to pay salaries commensurate with the skill and service of many teachers is a discouraging feature. This condition causes the loss of many efficient instructors every year, they being attracted to other fields by the larger salaries offered. However, notwithstanding the heavy strain on the board's finances they have succeeded in building two commodious primary buildings for white children, one at Riverside and the other at Glymont. They are now in operation.

Within the past two years our teachers have awakened to the importance of professional training and many of them have taken advantage of the Summer Training Schools and their good work has been most effective as has been demonstrated by encouraging results achieved in the year's work, viz: the spirit shown by teachers toward their work; the growth in the organization of the school; more system in the handling of the school and its work; a better preparation for lessons; a better planning for seat work; a growing spirit of more preparation.

We have endeavored to infuse into our whole schedule of studies from the lowest to the highest grades, the agricultural spirit, believing that the country children should be educated along these lines rather than in accordance with city models. We are expecting in this way to awaken a new interest in rural life on the part of country children and thus render life on the farm more attractive and remunerative than it is at present.

In many phases of our school work conditions are not what we desire, but we believe that they are at the same time improving and that the future is bright with the promise of a higher standard of equipment, both physical and intellectual.

Respectfully,

THOS. M. CARPENTER,
Superintendent.

FREDERICK COUNTY.

FREDERICK, MD., October 30, 1915.

Dr. M. Bates Stephens,
Secretary of State Board of Education,
Annapolis, Md.

DEAR SIR—It gives me great pleasure to report to you that our schools are manifesting greater interest along educational lines than ever in the past. By our endeavors to bring about better cooperation between district trustees and the school officials, the trustees are demanding better trained teachers for their respective schools.

During the present year seventy-five of our earnest teachers attended Summer School at Johns Hopkins University, Columbia University, Millersville State Normal, Maryland Agricultural College, and Pennsylvania University. This is very gratifying to all concerned and bespeaks a new omen in school work for Frederick County.

The School Board felt that to encourage these teachers, they would make a contribution of $40 to each teacher, and it is our policy to promote all teachers who endeavor to improve professionally.

The equipment in our High Schools has been improved to meet the requirements laid down by the State Board of Education. We have extended the agricultural course in the Boys' High School by connecting the same up with the farm through the organization of a "Farm Bureau." This work is done during vacation months. The agricultural course at Middletown High School has been enlarged and extended. Emmittsburg, Walkersville, Adamstown, Jefferson and Myersville High Schools have been consolidated with the Thurmont Middletown and Frederick High Schools, the School Board paying the transportation of pupils above the eighth grade. This policy by the Board met with some opposition in the beginning, but later in the year the same was generally supported by the different communities.

During the past year Domestic Science has been taught in the Girls' High School by teachers furnished us by Hood College, under the supervision and direction of our Domestic Science Supervisor, who has recently been appointed to this position. We have appointed five college graduates who have specialized in Home Economics to teach this subject in the accredited high schools of Frederick County. This includes courses in foods and cooking, household management and sewing.

An effort is being made to place some of this work also in the schools where there is an eighth grade, in order to enable those students to receive full credit for eighth grade work. In order to make a beginning, one of the regular grade teachers in each of these schools

has volunteered to teach sewing and these teachers meet the Domestic Science Supervisor every two weeks in Frederick for the purpose of receiving instruction for carrying out her plans, and we hope soon to be able to extend this work into the grades, correlating the same with other subjects.

Both students and teachers seem interested and very enthusiastic, and aid materially by their cooperation with the plans of the Supervisor.

A new brick school building at Thurmont, costing approximately $32,000, with ten classrooms and a large assembly hall, will be ready for occupancy by the first of September, 1915. A modern three-room brick building at Burkittsville was completed December, 1914. Also, there is under construction a three-room brick building at Wolfsville. These buildings were the outgrowth of educational interests taken by the progressive people of growing communities.

One condition that confronts us is the lack of cooperation between the rural school and the community. This condition is not general, but wherever it exists, the fault is largely on account of the teacher not living in the community.

We have arranged to carry out the Teachers' Training Course for the High Schools, and have appointed a competent teacher from Columbia University to take charge of this work. Under his supervision, we hope to organize training courses throughout the county for teachers who are in the profession.

It is gratifying to note that our enrollment and average attendance have increased the past year owing to the enforcement of compulsory education.

By making a complete adjustment of the teachers salaries throughout the county, new life seemed to be added to school work.

Very resyectfully,

G. LLOYD PALMER,
Superintendent.

TEACHER'S TRAINING COURSE.

Course No. 1.

October 9, 1915, 10 A. M., Girls' High School.

TEACHING OF THE COMMON BRANCHES.

This course is intended to meet the needs of teachers who have had little or no previous training in pedagogy. The principles of teaching and their application to various subjects in the curriculum of the elementary schools will be considered, according to the following plan:

I Concrete Examples.

1. Arithmetic.
   Subject matter.
   Motive for study.
   Method of study.
   Class mechanics.

2. History.
3. Geography.
4. Language and Grammar.

II. Generalizations.
The function of teaching.
Motive in education.
Forms of instruction.
Assignment of lessons.
Planning of lessons.

The work will consist of required reading and discussion based upon a text.

Course No. 2.
October 16, 1915, 10 A. M., Girls' High School.
TYPES OF TEACHING.

This course is designed for experienced teachers and those who have taken professional training. The application of the principles of teaching to every-day school problems will be considered, including such questions as

1. The Aims of Education and the means employed to accomplish them.
2. Forms of Instruction.
Study.
Recitation.
Telling vs. Development.
Appreciation lessons.
Review and Examination.
Drill.
3. Assignment of lessons.
4. Planning lessons.
5. Class Management.

The topics may vary according to the interests of the class.

"Types of Teaching" by Lida B. Earhart will be used as a basis for reading and discussion.

SOMERSET COUNTY.

PRINCESS ANNE, MD., August 5, 1915.

Dr. M. Bates Stephens,
Secretary, State Board of Education,
Annapolis, Md.

DEAR SIR—I am sending you herewith report of the public schools for Somerset County, for the year ending July 31st, 1915.

The enrollment of pupils was not quite so great as that for 1914. The average attendance, however, has improved. The number of pupils over 16 is also larger by 31, than for the year 1914. The number of pupils in high schools, by a curious coincidence, remains the same, pupils in high schools, by a curious coincidence, remains the same, namely 378.

Our second Field and Exhibit Day was held on May 7th, and was a great success. Nearly every school in the county was present and accompanied by its teachers and trustees. It is our purpose next Spring to change the place of meeting to Crisfield, as it is the ardent wish of the people of that section.

One month was added to the school year of the colored schools. The year now consisting of 6 months, instead of 5, as heretofore. The second year of Industrial Training in the colored schools was successfully completed. It is the purpose of the Board to open another department at Upper Fairmount, and a building for that purpose is being erected.

The sum of $4,500.00 has been levied for the erection of a new High School building on Deals Island, an improvement that is greatly needed.

It is well that I should call your attention to the fact, that although the year closed with notes amounting to $10,500.00 in bank, we have uncollected assets ample to meet such obligations, and some surplus for further building purposes.

Yours very truly,

W. H. DASHIELL,
County Superintendent.

WASHINGTON COUNTY.

HAGERSTOWN, MD., November 26, 1915.

Dr. M. Bates Stephens,
State Superintendent of Education,
Annapolis, Md.

DEAR SIR—I herewith submit the annual report of the Public Schools of Washington County for the fiscal year ending July 31, 1915.

As evidence of the awakening interest of our school patrons in education no better testimony can be given than the increase of 400 pupils in enrollment this past year.

The Board is endeavoring to encourage this interest by providing better school facilities and courses of study that will meet the needs of the community.

The one-teacher rural school building erected in 1914 at Fountaindale will be taken as the type for all such schools built in this county. This building was planned by a local architect, who embodied in it all the requirements laid down by the U. S. Department of Education for such a building.

Two two-room and two eight-room schools have been built following these requirements. Waterbury heaters have been put in these one- and two-room buildings.

Some progress has been made in bringing in seventh and eighth grade pupils from the overcrowded rural schools to the central school at Fair Play. An auto-truck is used to convey these pupils from their home schools to the central school.

A new four-room school has been built at Leitersburg which will be made the central school for this neighborhood. One school has already been closed and the pupils transferred to this school. It is hoped that two others will appreciate the increased opportunities offered at this central school and that they soon consent to being transferred.

An Agricultural High School has been established at Clearspring, meeting the needs of a very large farming community. A similar school being at Smithsburg.

A night school with three teachers employed by the Board has been opened in Hagerstown with an enrollment of 110 pupils ranging in age from fourteen years to manhood, and in previous school experience from the first grade to the seventh grade. It is hoped that this work may be broadened by adding courses in science for the operatives in the factories of Hagerstown.

Increased public interest, better facilities and better courses of study demand better teachers. Seventy teachers of this county recognized this and received the aid of the Board in taking Summer School work.

Very truly yours,

W. MERRICK HUYETT.

COLORED INDUSTRIAL WORK.

SOMERSET COUNTY.

UPPER FAIRMOUNT, MD., July 27th, 1915.

To the School Board of Somerset County,
Princess Anne, Md.

GENTLEMEN—As supervisor of the "Public Colored Schools of Somerset County," I herewith submit to you my second annual report. The school year opened with an enthusiastic Institute held in the Princess Anne Academy with all the teachers present. The president and secretary of our School Board inspired and energized us for the work by their helpful addresses. We thank our "School Board" for the extension of our school term, for the erection of three (3) new school buildings, (viz) Deals Island, Kingston, Findleys, for repairs made on Hopewell and East Princess Anne schools, for the reopening of the school at Revels Neck, and for the buildings to be erected in the near future at Marion, Eden and Upper Fairmount. For a short while during the winter a number of our schools were closed on account of smallpox. There seems to be a general awakening throughout the county in the interest of Public Education. The patrons at Eden gave a plot of land upon which a new building is to be erected, at Marion, during two "Educational Rallies" the patrons contributed in actual cash two hundred and fifty dollars ($250.00) to assist in the erection of a much needed school building. Liberia, Puncheon Landing and other points are sacrificing in like manner. We are pleased to report progress and excellent results in our Industrial Departments Manual Training and Domestic Science, our exhibit at the close of the term reflected credit upon teachers and pupils alike, and received the approval of the School Board. We have (27) twenty-seven school buildings, (36) thirty-six teachers and an enrollment of nearly two thousand (2,000) pupils. The supervisor and a few of the teachers attended summer school at Hampton Normal and Industrial Institute, Hampton, Va., and Princess Anne Academy, Princess Anne, Md.

Respectfully submitted,

HERBERT S. WILSON,
Supervisor.

FINANCIAL REPORTS.

REPORT OF M. BATES STEPHENS, TREASURER. STATE BOARD OF EDUCATION.
